Kwame Nkrumah's Liberation Thought Robert Yaw Owusu,2006 An attempt to recapture the liberation philosophy of Kwame Nkrumah first prime minister of Ghana Owusu seeks to define a theoretical basis on which a modern socio political and ethical structure for Ghana can be built and offers a paradigm for developing a role of advocacy to the Ghanaian religious edifice He also strives to recapitulate Ghana s self dignity self realisation and self subsistence by highlighting the essential assumptions dimensions and specificities of African personhood Polarization and Transformation in Zimbabwe

Erin McCandless,2011-08-16 Social movements and civic organizations often face profound strategy dilemmas that can hamper their effectiveness and prevent them from contributing to transformative change and peace In Zimbabwe two particular dilemmas have fed into and fueled destructive processes of political polarization dividing society leadership and decision makers well beyond its borders As conceptualized in this study the first is whether to prioritize political or economic rights in efforts to bring about nation wide transformative change rights or redistribution The second is whether and how to work with government and or donors given their political economic and social agendas participation or resistance This book investigates these issues through two social movement organizations the National Constitutional Assembly and the Zimbabwe National War Veterans Association and the movements they led to achieve constitutional change and radical land redistribution Through in depth case study analysis and peace and conflict impact assessment spanning the years 1997 2010 lessons are drawn for activists practitioners policy makers and scholars interested in depolarizing concepts underpinning polarizing discourses transcending strategy dilemmas and understanding how social action can better contribute to transformative change and peace **Reforming the African Public Sector. Retrospect and Prospects** Joseph R. A.

Ayee,2008 Reforming the African Public Sector Retrospect and Prospects is an in depth and wide ranging review of the available literature on African public sector reforms It illustrates several differing country experiences to buttress the main observations and conclusions It adopts a structural institutional approach which underpins most of the reform efforts on the continent To contextualize reform of the public sector and understand its processes dynamics and intricacies the book examines the state and state capacity building in Africa especially when there can be no state without an efficient public sector In addition the book addresses a number of theories such as the new institutional economics public choice and new public management which have in one way or another influenced most of the initiatives implemented under public sector reform in Africa There is also a survey of the three phases of public sector reform which have emerged and the balance sheet

of reform strategies namely decentralization privatization deregulation agencification co production and public private partnerships It concludes by identifying possible alternative approaches such as developing a vigorous public sector ethos and sustained capacity building to promote and enhance the renewal and reconstruction of the African public sector within the context of the New Partnerships for Africa s Development NEPAD good governance and the Millennium Development Goals MDGs

Transforming Mozambique M. Anne Pitcher, 2002-11-14 Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe Yet much of the comparative literature on transitions has overlooked African countries This 2002 study of Mozambique s shift from a command to a market economy draws on a wealth of empirical material including archival sources interviews political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo liberals and their critics Alongside the state social forces from World Bank officials to rural smallholders have also accelerated thwarted or shaped change in Mozambique M Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country She demonstrates that Mozambique s political economy is a heterogenous blend of ideological and institutional continuities and ruptures Studies in World Affairs Ed. Guarding the Guardians Mathurin C. Hounnikpo, 2016-04-22 The relationship between civil society and the armed forces

is an essential part of any polity democratic or otherwise because a military force is after all a universal feature of social systems. Despite significant progress moving towards democracy among some African countries in the past decade, all too many African militaries have yet to accept core democratic principles regulating civilian authority over the military. This book explores the theory of civil-military relations and moves on to review the intrusion of the armed forces in African politics by looking first into the organization and role of the army in pre-colonial and colonial eras before examining contemporary armies and their impact on society. Furthermore, it revisits the various explanations of military takeovers in Africa and disentangles the notion of the military as the modernizing force. Whether as a revolutionary force, as a stabilizing force, or as a modernizing force, the military has often been perceived as the only organized and disciplined group with the necessary skills to uplift newly independent nations. The performance of Africa's military governments since independence, however, has soundly disproven this thesis. As such, this study conveys the necessity of new civil-military relations in Africa and calls not just for civilian control of the military but rather a democratic oversight of the security forces in Africa.

Millennial Africa John S. Saul, 2001. Following his two widely read volumes of essays, Saul projects his analysis of the economic and social structure of southern Africa in relation to the rest of the world forward into the new millennium. Painstakingly confronting central questions related to the practice of war and peace and to the prospects for democracy and development throughout the continent, Saul emphasises that the problems of Africa are continually shaped by its insertion in the global capitalist system and suggests that the struggle for socialism must be a part of the solution for contemporary Africa.

The Voluntary Sector and Sustainable Development in Africa: NGO Dilemmas Bolaji Ogunseye, **Civil Society & Development** Jude Howell, Jenny Pearce, 2001. Setting out to explore critically the way civil society has entered development thinking, policy and practice as a paradigmatic concept of the 21st century, Howell (development studies, U of Sussex) and Pearce (Latin American politics, U of Bradford) trace the historical path leading to the encounter between the ideas of development and civil society in the late 1980s and how donors have translated these into development policy and programs. They find that there are competing normative visions which have deep roots in Western European political thought about the role of civil society in relation to the state and market, both among donors and within the societies where donors are operating. This leads to donors playing a major role in shaping the character of service provision. They also argue that their study exposes the hitherto unexplored power of the market as opposed to solely the state to distort donor programs. c. Book News Inc.

Enclaves of Exception Omolade Adunbi, 2022-05-10. How do we measure and truly grasp the sweeping social and environmental effects of an oil-based economy? Focusing on the special economic zones resulting from China's trading partnership with Nigeria, *Enclaves of Exception* offers a new approach to exploring the relationship between oil and technologies of extraction and their interrelatedness to local livelihoods and environmental practices. In this groundbreaking work, Omolade Adunbi argues that even though the exploitation of oil resources is dominated by big corporations, it establishes opportunities for many

former Nigerian insurgents and their local communities to contest the ownership of such resources in the oil rich Niger Delta and to extract oil themselves and sell it Based on extensive ethnographic fieldwork Enclaves of Exception makes clear that although both the free trade zones and the now booming local artisanal refineries share the goals of profit making and are enthusiastically supported by those benefiting from them economically they have yielded dramatically the same environmental outcome for communities around them that included pollution with precarious effects on the health of the populations in the regions and displacement of population from their livelihood practices

Continuity and Change in Sub-Saharan African Demography Clifford O. Odimegwu, John Kekovole, 2014-07-11 This book offers an in depth African perspective to the major issues in demographic discourse in sub Saharan Africa It provides comprehensive analysis of sub Saharan African censuses profiling demographic changes trends patterns and consequences in the region Interdisciplinary comprehensive accessible simple and topical this volume is perfectly suited to researchers students and lecturers who are interested in understanding sub Saharan African population dynamics and issues

The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity Bringing together perspectives from top Africa scholars it actively dispels myths of the continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa s relations with the world
