## **African Genesis Perspectives On Hominin Evolution:**

**African Genesis** Sally C. Reynolds, Andrew Gallagher, 2012 Reviews key themes and developments in palaeoanthropology exploring their impact on our understanding of human origins in Africa African Paleoecology and Human Evolution Sally C. Reynolds, René Bobe, 2022-06-09 A comprehensive account of hominin fossil sites across Africa including the environmental and ecological evidence central to our understanding of human evolution **Anthropological Perspectives on Tooth Morphology** G. Richard Scott, Joel D. Irish, 2013-02-21 Researchers have long had an interest in dental morphology as a genetic proxy to reconstruct population history Much interest was fostered by the use of standard plaques and associated descriptions that comprise the Arizona State University Dental Anthropology System developed by Christy G Turner II and students This system has served as the foundation for hundreds of anthropological studies for over 30 years In recognition of that success this volume brings together some of the world s leading dental morphologists to expand upon the concepts and methods presented in the popular *The Anthropology of Modern Human Teeth* Cambridge 1997 leading the reader from method to applied research After a preparatory section on the current knowledge of heritability and gene expression a series of case studies demonstrate the utility of dental morphological study in both fossil and more recent populations and individuals from local to global scales Modern Origins Jean-Jacques Hublin, Shannon McPherron, 2012-03-31 Over the last decade Africa has taken a central position in the search for the timing and mechanisms leading to modern human origins and the rich archaeological and human paleontological record of North Africa is critical to this search In this volume we bring together new research into the archaeology human paleontology chronology and environmental context of modern human origins in North Africa The result is a volume that better integrates the North African record into the modern human origins debate and at the same time highlights the research questions that are currently the focus of continued work in the area *Human Paleoneurology* Emiliano Bruner, 2014-07-21 The book presents an integrative review of paleoneurology the study of endocranial morphology in fossil species The main focus is on showing how computed methods can be used to support advances in evolutionary neuroanatomy paleoanthropology and archaeology and how they have contributed to creating a completely new perspective in cognitive neuroscience Moreover thanks to its multidisciplinary approach the book addresses students and researchers approaching human paleoneurology from different angles and for different purposes such as biologists physicians anthropologists archaeologists and computer scientists The individual chapters written by international experts represent authoritative reviews of the most important topics in the field All the concepts are presented in an easy to understand style making them accessible to university students newcomers and also to anyone interested in understanding how methods like biomedical imaging digital anatomy and computed and multivariate morphometrics can be used for analyzing ontogenetic and phylogenetic changes according to the principles of functional morphology morphological integration and modularity *Hominin Postcranial Remains from Sterkfontein, South*

*Africa, 1936-1995* Bernhard Zipfel, Brian Richmond, Carol V. Ward, 2020 This volume is the first source to present an in depth analysis of postcranial fossils allowing readers to cross compare standardized data for themselves The Evolutionary Biology of the Human Pelvis Cara M. Wall-Scheffler, Helen K. Kurki, Benjamin M. Auerbach, 2020-01-16 Synthesizes and re examines the evolution of the human pelvis which sits at the interface between locomotion and childbirth
