Edmonds,2025-04-21 While the study of Assyria as the world's first empire has never been more popular the events of the foundational early Neo Assyrian period 934-746 BC remain only poorly understood and explained This book re-examines the historical question of Assyria's expansion presenting a novel reconstruction of the early Neo Assyrian period with the latest data detailed regional studies synthesising the newest historical and archaeological findings and interpretative essays outlining new historical factors The resultant history is unprecedentedly complex containing newly discovered succession conflicts and rebel Assyrian kings difficult compromises with neighbouring powers local dynasties appointed to Assyrian governorships self-serving high officials and sudden reverses in policy In place of circular structuralist arguments for the Neo Assyrian expansion it presents a new model emphasising internal political conflict and competing visions for Assyria's future This book is intended for historians and archaeologists of Assyria for whom it will provide a new basis for research and also for scholars of neighbouring disciplines and laypersons interested in what happens to an ancient state before it becomes an empire

Revisiting Rape in Antiquity Susan Deacy, José Malheiro Magalhães, Jean Zacharski Menzies,2023-06-29 In 1997 the publication of *Rape in Antiquity* established rape as a viable field for classical scholarship This wideranging new survey builds on that volume's legacy to show what has changed in classical research relevant to understanding rape It responds to the debates around how to define rape that have emerged over recent decades including over how to categorise rape both in emic and in etic terms especially when the Greeks and Romans lacked any word that corresponded with our rape yet possessed an extensive vocabulary for use in relation to coercive and other forms of bad sex The contributors brought together from across the world and including senior researchers and emerging scholars engage both with developments in classical research and with developments in other disciplines that can frame new approaches to ancient evidence these include feminist theory psychology and conflict studies They look at the move to locate the female voice and female subjectivity including in seemingly unlikely places the identification of violence against women as a tool of ancient warfare and definitional issues including the shift advocated by Stewart and others from rape to rape Through its coherent goal of showing the ongoing relevance of rape as a topic for classical research the volume is also the first to present multiple and diverse perspectives in terms of chronology from ancient Greece ancient Rome Late Antiquity and the postclassical periods and in terms of evidence including law drama medical literature art philosophy and postclassical art cinema and graphic novels
