Goodell,2010-04-15 Thoughtful informative and darkly entertaining It s the best treatment of this important and scary topic you can find Elizabeth Kolbert Right now a group of scientists is working on ways to minimize the catastrophic impact of global warming But they re not designing hybrids or fuel cells or wind turbines They re trying to lower the temperature of the entire planet And they re doing it with huge contraptions that suck CO2 from the air machines that brighten clouds and deflect sunlight away from the earth even artificial volcanoes that spray heat reflecting particles into the atmosphere This is the radical and controversial world of geoengineering which only five years ago was considered to be fringe But as Jeff Goodell points out the economic crisis combined with global political realities is making these ideas look sane even inspired Goodell himself started out as a skeptic concerned about tinkering with the planet s thermostat We can t even predict next week s weather so how are we going to change the temperature of whole regions What if a wealthy entrepreneur shoots particles into the stratosphere on his own Who gets blamed if something goes terribly wrong And perhaps most disturbing what about wars waged with climate control as the primary weapon There are certainly risks but Goodell believes the alternatives could be worse In the end he persuades us that geoengineering may just be our last best hope a Plan B for the environment His compelling tale of scientific hubris and technical daring is sure to jump start the next big debate about the future of life on earth Goodell explores with infectious curiosity and thoughtful narration this strange promising and untested suite of climate fixes BusinessWeek A quick enjoyable read through a complex timely topic And after you read it you ll never

processes that have been at work These include the social construction of the Organicism versus Mechanicism debate in ecology the intellectual links between neo classical economic principles and the New Sciences the techno scientific background of Gaia theory and the social conservatism of ecological functionalism

Self, Earth, and Society Thomas N. Finger,2020-03-12 Our era is experiencing unparalleled and rapid transience The twentieth century began with the telephone and ended with e mail People change jobs and homes a half dozen times or more in their lives Air and water pollution are threatening the well being of the earth itself Wars their multiplying refugees and political crises are tearing societies apart If there is a key word for our era it might be alienation Amid increasing and often chaotic complexity individuals struggle to attain an integrated stable self with durable relationships An expanding ecological consciousness reveals our estrangement from the earth Societies are internally divided by clashing political and economic perspectives and processes This profound and important book recognizes and reveals the connections among these three alienations Thomas Finger undertakes a probing critical conversation with culture and develops his own public theology Each alienation is analyzed in depth through the writings of secular authors His theological construction draws neither on modern philosophy nor worldviews but perhaps surprisingly on Scripture To support his emphasis on Christ Finger engages the skepticism of the much celebrated Jesus Seminar He rejects the widespread claim that Christianity's transcendent God is largely absent from the world and legitimates human exploitation of it For transcendence means that God is different but not distant from the world Finger then examines the roles of Jesus Father and Spirit in his earthly ministry In this and later scriptures these three act and interact in a salvific manner that can only be divine This means that his Father and Spirit also suffer with Jesus in his death and with all creation as Jurgen Moltmann brilliantly explains and accompany him in his resurrection This also means that the creation exists in God as some feminists maintain and originated as the overflow of God's love and character into a realm which was hardly distant from God yet very different In addition this entails that every human self and the process of becoming a self as God's creations must be respected as indeed must all earthly creatures and the basic structures needed to form and maintain any society Theological developments in the last decade have done much to critique misguided biblical interpretations which would justify unbridled human exploitation and abuse of creation But work in exploring how an understanding of a trinitarian transcendent God results in creative and caring relationship between humanity and creation has been less developed In discussing these matters with Dr Finger I am convinced that his proposed work holds the promise of meeting an important need within global theological discussions today Further I know that Dr Finger is fully capable of

accomplishing this project Thus from my vantage point where I have the opportunity of hearing theological discussions on these subjects from the major Christian traditions and from throughout the globe it is clear that Dr Finger s proposal will fill a theological void and enrich our search for truth Wesley Granberg Michaelson Executive Secretary Commission on Church and Society World Council of Churches 1988 1994 General Secretary Reformed Church in America 1994 2011 The Three Ages of Atlantis Diego Marin,Ivan Minella,Erik Schievenin,2013-11-28 Scientific and anthropological evidence for multiple Atlantean empires and the global catastrophes that destroyed them Reveals that there was not one but three Atlantises the first in Antarctica the second in South America and the third in the Mediterranean Examines geological evidence of super floods 15 000 11 600 and 8 700 years ago Shows how these flood dates directly parallel the freezing of Antarctica the migrations of Cro Magnon men and the destruction of Atlantis according to Plato 15 000 years ago the Earth s axis tilted shifting the geographic poles Volcanoes erupted the icecaps melted and the seas rose dramatically Antarctica was enveloped in ice destroying the high civilization of prehistory Atlantis But before the survivors could reestablish what they had lost catastrophe struck again twice Uniting scientific findings with theories on the location of Atlantis the authors reveal that there was not one but three Atlantises the first in Antarctica the second in South America and the third in the Mediterranean Examining paleoclimatology data they show that Antarctica was temperate 15 000 years ago and home to the original Atlantis They explore geological evidence of three worldwide super floods 15 000 11 600 and 8 700 years ago and show how these dates directly parallel the freezing of Antarctica the arrival of Cro Magnon man in Europe and the destruction of Atlantis according to Plato Uncovering the influence of the Atlanteans in Proto Indo European languages and in massive ancient monuments aligned with the stars they show how the civilization founders in all early myths the Pelasgians Danaans Viracocha Aryans and others were part of the Atlantean diaspora and how this migration split into two major movements one to Latin America and the other to Europe and Asia Following the Atlanteans from a warm Antarctica up to Peru Mexico and the Mediterranean they reveal that Cro Magnon men are the people of Atlantis and that we are just now returning to their advanced levels of science technology and spirituality The Last Ranch Sam Bingham,1997 The year environmentalist Sam Bingham spent in Colorado s San Luis Valley showed him that environmental disasters of global consequence are happening in our own backyard THE LAST RANCH tells of the desperate efforts of one community to stop the encroaching desert A rare and beautifully written account of hard lives in hard times and must reading for those interested in the future of the American West KIRKUS REVIEWS
