Wolf,1961 A History of Science, Technology, & Philosophy in the 18th Century : Vol II. A. Wolf,1961 *A History of Science Technology and Philosophy in the 18th Century* Abraham Wolf,2019-04-23 Published in 1938 The new volume presents a full and profusely illustrated account of progress made during the eighteenth century in Mathematics Mechanics Astronomy Physics Meteorology Geography Chemistry Biology Medicine Psychology Demography Economics Philosophy and Technology **The Correspondence of James Jurin (1684-1750)** Andrea A. Rusnock,2020-01-29 James Jurin 1684 1750 occupied a central place in the medical and scientific circles of Augustan and Georgian England His dispassionate yet forceful advocacy of smallpox inoculation using an innovative statistical approach brought him widespread recognition both in Britain and abroad He was Secretary to the Royal Society for seven years and participated vigorously in the most important scientific debates of the period Jurin s correspondence recently made available to the public provides rich material for the study of eighteenth century natural philosophy and medicine especially of the smallpox inoculation debates This volume reproduces a broad and valuable selection of letters as well as a list of Jurin s publications and a calendar of the complete correspondence The introductory biographical essay describes how Jurin combined a career as a successful London physician with that of a natural philosopher *The Theory of Sound, Volume One* J. Epistemology and Natural Philosophy in the 18th Century Danilo Capecchi,2020-08-25 This book documents the process of transformation from natural philosophy which was considered the most important of the sciences until the early modern era into modern disciplines such as mathematics physics natural history chemistry medicine and engineering It focuses on the 18th century which has often been considered uninteresting for the history of science representing the transition from the age of genius and the birth of modern science the 17th century to the age of prodigious development in the 19th century Yet the 18th century the century of Enlightenment as will be demonstrated here was in fact characterized by substantial ferment and novelty To make the text more accessible little emphasis has been placed on the precise genesis of the various concepts and methods developed in scientific enterprises except when doing so was necessary to make them clear For the sake of simplicity in several situations reference is made to the authors who are famous today such as Newton the Bernoullis Euler d Alembert Lagrange Lambert Volta et al not necessarily because they were the most creative and

original minds but mainly because their writings represent a synthesis of contemporary and past studies The above names should therefore be considered more labels of a period than references to real historical characters

The Cambridge History of Literary Criticism: Volume 4, The Eighteenth Century H. B. Nisbet, Claude Rawson, 2005-12-08 This is a comprehensive 1997 account of the history of literary criticism in Britain and Europe between 1660 and 1800 Unlike previous histories it is not just a chronological survey of critical writing but a multidisciplinary investigation of how the understanding of literature and its various genres was transformed at the start of the modern era by developments in philosophy psychology the natural sciences linguistics and other disciplines as well as in society at large In the process modern literary theory at first often implicit in literary texts themselves emancipated itself from classical poetics and rhetoric and literary criticism emerged as a full time professional activity catering for an expanding literate public The volume is international both in coverage and in authorship Extensive bibliographies provide guidance for further specialised study

In the Shadow of the Machine Jeremy Naydler,2018-05-29 Contemporary life is so deeply reliant upon digital technology that the computer has come to dominate almost every aspect of our culture What is the philosophical and spiritual significance of this dependence on electronic technology both for our relationship to nature and for the future of humanity And what processes in human perception and awareness have produced the situation we find ourselves in As Jeremy Naydler elucidates in this penetrating study we cannot understand the emergence of the computer without seeing it within the wider context of the evolution of human consciousness which has taken place over millennia Modern consciousness he shows has evolved in conjunction with the development of machines and under their intensifying shadow The computer was the product of a long historical development culminating in the scientific revolution of the 17th century It was during this period that the first mechanical

calculators were invented and the project to create more complex thinking machines began in earnest But the seeds were sown many hundreds of years earlier deep in antiquity Naydler paints a vast panorama depicting human development and the emergence of electronic technology His painstaking research illuminates an urgent question that concerns every living person today What does it mean to be human and what if anything distinguishes us from machines History of Science and Philosophy of Science Pradip Kumar Sengupta,2010

From Hesiod to Saussure, From Hippocrates to Jevons: Volume III Jens Høyrup,2024-05-31 This book is the third of a three volume set introducing the history of scientific thought including social and human science The area covered in this volume is Western Europe during the 18th and 19th centuries Combining general descriptions with extensive excerpts from original sources in English

translation it concentrates on ways of thinking and actual argumentation and not just on results and mistakes questions of validity are primarily dealt with in the perspective of the time of the writing not on that of the 21st century The work is of great interest to historians of science and culture students as well as seasoned workers but also for amateurs willing to invest the necessary serious efforts
