*Points of View in the Modern History of Psychology* Claude E.

Buxton, 2013-10-22 Points of View in the Modern History of Psychology is a collection of papers that presents each individual contributor's expert knowledge of history in the field of psychology. One paper examines Wilhelm Wundt's concept of psychology as the propaedeutic science surviving and inspiring a generation or more of psychologists. Another paper discusses the early sources and the basic conceptions of functionalism as used in America. John B. Watson proclaims behaviorism as a new discipline in psychology with defining features such as an objective deterministic scientific and experimental method that can be used in both human and animal studies. Lieberman 1979, Mackenzie 1977, Miller, Galanter and Pribram 1960 oppose behaviorism on the grounds that it slights the purpose of psychology and focuses more on methodology to the detriment of theory. One paper notes that the acceptance or influence that a point of view has is based in some ways on the range and clarity of its connections with experimental and observational reality. This collection can prove useful for psychologists, behavioral scientists, psychiatrists, psychoanalysts, students of psychology, philosophy or general history who are interested in the many viewpoints of psychology.

*A History of Experimental Psychology* Edwin Garriques Boring, 1929

**A History of Modern Psychology** Duane P. Schultz, 1975. A History of Modern Psychology Second Edition discusses the development and decline of schools of thought in modern psychology. The book presents the continuing refinement of the tools, techniques and methods of psychology in order to achieve increased precision and objectivity. Chapters focus on relevant topics such as the beginning of the history of psychology, the philosophical and physiological influences on psychology, the details of various schools of thought in psychology and the contemporary psychology of America and other countries. Undergraduate students of psychology and related

**Wilhelm Wundt in History** Robert W. Rieber, David K. Robinson, 2012-12-06. In this new millennium it may be fair to ask: Why look at Wundt? Over the years many authors have taken fairly detailed looks at the work and accomplishments of Wilhelm Wundt 1832-1920. This was especially true of the years around 1979, the centennial of the Leipzig Institute for Experimental Psychology, the birthplace of the graduate program in psychology. More than twenty years have passed since then and in the intervening time those centennial studies have attracted the attention and have motivated the efforts of a variety of historians, philosophers, psychologists and other social scientists. They have profited from the questions raised earlier about theoretical, methodological, sociological and even political aspects affecting the organized study of mind and behavior; they have also proposed some new directions for research in the history of the behavioral and social sciences. With the advantage of the historiographic perspective that twenty years can bring, this volume will consider this much heralded founding father of psychology once again. Some of the authors are veterans of the centennial who contributed to a very useful volume edited by Robert W. Rieber: *Wilhelm Wundt and the Making of a Scientific Psychology* New York: Plenum Press, 1980. Others are scholars who have joined Wundt studies since then and have used that book among others as a guide to further work. The first chapter, "Wundt before Leipzig," is essentially unchanged from the 1980 volume.

**Historical and Conceptual Issues in Psychology** Marc Brysbaert, Kathy

Rastle,2009 Written in a lively and engaging style this book is richly illustrated and unique in its presentation of historical and conceptual ideas It focuses on how political religious social and intellectual changes have affected views on the universe Earth and mankind     A Brief History of Psychology Michael Wertheimer,2012 This edition approaches psychology as a discipline with antecedents in philosophical speculation and early scientific experimentation It covers these early developments 19th century German experimental psychology and empirical psychology in tradition of William James the 20th century dubbed the age of schools and dominated by psychoanalysis behavioralism structuralism and Gestalt psychology as well as the return to empirical methods and active models of human agency Finally it evaluates psychology in the new millennium and developments in terms of women in psychology industrial psychology and social justice     *A History of Modern Psychology in Context* Wade Pickren,Alexandra Rutherford,2010-02-22 In *A History of Modern Psychology in Context* the authors resist the traditional storylines of great achievements by eminent people or schools of thought that rise and fall in the wake of scientific progress Instead psychology is portrayed as a network of scientific and professional practices embedded in specific contexts The narrative is informed by three key concepts indigenization reflexivity and social constructionism and by the fascinating interplay between disciplinary Psychology and everyday psychology     **Report of the Federal Security Agency** United States.
