into state constitutions and eventually into the federal Constitution In communities from New Hampshire to Oregon new forms of local organizing have sprung up to fight fracking mining dumping of toxic waste and industrial agriculture among other environmental assaults These communities have recognized that the law has legalized the damaging actions of corporations while providing no recourse against harm and they have therefore decided to create a new system of law that makes local control and sustainability legal Starting small this process has spread from rural Pennsylvania to larger cities and towns and has resulted in the creation of state networks seeking to amend state constitutions This work is about finishing the American Revolution by giving up the illusion of democracy and forging a system of true self governance In addition this is about recognizing in law for the first time in history that nature possesses legally enforceable rights of its own
