

Introduction

As container technologies mature, more and more enterprise applications are deployed using containers. This brings into focus the need to have a robust container orchestration and management tools like schedulers, cluster management, service discovery, secrets management, monitoring, etc.. Kubernetes and Nomad are two prominent orchestration tools in the space and this research brief will help you understand how they fit into cloud native landscape:

- Nomad is the workload scheduler and orchestrator from Hashicorp to manage containerized and non containerized workloads
- Kubernetes is the container orchestration platform from Cloud Native Computing Foundation to orchestrate and manage containerized workloads.
