Writing Spaces C. Greig Crysler, 2003-09-02 This book explores how journals mediate and transform our understanding and experience of buildings urban spaces and architectural cultures *Derrida for Architects* Richard Coyne, 2011-08-26 Jacques Derrida s thinking is radical provocative controversial and even difficult This book looks afresh at Derrida s thinking in relation to architecture It simplifies his ideas in a clear concise way As well as a review of Derrida s interaction with architecture it is also a careful consideration of the implications of his thinking particularly on the way architecture is practiced **Critical Practices in Architecture** Jonathan Bean, Susannah Dickinson, Aletheia Ida, 2020-01-06 This book embraces the idea that in today s complex world multiple emerging perspectives are critical to the design fields the environment and society It also brings authors into conversation to focus on the built environment from the perspective of critical practice The authors take as a starting point Jane Rendell s ground breaking work which defines critical spatial

practice as self reflective modes of thought that seek to change the world In opposition to conventional conceptions of architectural education and work this book reflects how socially engaged architects landscape architects designers urbanists and artists take up critical spatial practice Bridging ideas from multiple countries and approaches to design scholarship each chapter seeks to find places of convergence for the multiple strands that form around themes of practice equality methods theory ethics pedagogy and representation Rendell s foreword and postscript provide context for these themes and suggest a way forward in today s challenging changing times **Library of Congress Subject Headings** Library of Congress,2004

Library of Congress Subject Headings Library of Congress. Cataloging Policy and Support Office,2007 *Image, Text, Architecture* Robin Wilson,2016-03-09 Image Text Architecture brings a radical and detailed analysis of the modern and contemporary architectural media addressing issues of architectural criticism architectural photography and the role of journal editors It covers examples as diverse as an article by British artist Paul Nash in The Architectural Review 1940 an early project by French architects Lacaton Vassal published in the journal 2G 2001 and recent photography by Hisao Suzuki for the Spanish journal El Croquis At the intersection of image and text the book also reveals the role of the utopian impulse within the architectural media drawing on theories of utopian discourse from the work of the French semiotician and art theorist Louis Marin and the American Marxist critic Fredric Jameson Through this it builds a fresh theoretical approach to journal studies revealing a hitherto unexplored dimension of latent or unconscious discourse within the media portrait of architecture The purpose of this enquiry is to highlight moments where a different type of critical voice emerges on the architectural journal page indicating the possibility of a more progressive engagement with the media as a platform for critical and speculative thinking about architecture and to rethink the journals role within architectural history

Reflections on Architecture, Society and Politics Graham Cairns,2016-10-04 Reflections on Architecture Society and Politics brings together a series of thirteen interview articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the social sciences including Noam Chomsky Peggy Deamer Robert A M Stern Daniel Libeskind and Kenneth Frampton Each chapter explores the relationship between architecture and socio political issues through discussion of architectural theories and projects citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment Ranging from Chomsky s examination of the US Mexico border as the architecture of oppression to Robert A M Stern s defence of projects for the Disney corporation and George W Bush this book places politics at the center of issues within contemporary architecture American Architectural History Keith Eggner,2004-07-31 This major new text presents a collection of recent writings on architecture and urbanism in the United States with topics ranging from colonial to contemporary times In terms of content and scope there is no collection in or out of print directly comparable to this one The essays are drawn from the past twenty years of publishing in the field arranged chronologically from colonial to contemporary and accessible in

thematic groupings contextualized and introduced by Keith Eggener Drawing together 24 illustrated essays by major and emerging scholars in the field American Architectural History is a valuable resource for students of the history of American art architecture urbanism and material culture Merleau-Ponty and the Art of Perception Duane H. Davis, William S. Hamrick, 2016-03-01 This collection of essays brings together diverse but interrelated perspectives on art and perception based on the philosophy of Maurice Merleau Ponty Although Merleau Ponty focused almost exclusively on painting in his writings on aesthetics this collection also considers poetry literary works theater and relationships between art and science In addition to philosophers the contributors include a painter a photographer a musicologist and an architect This widened scope offers important philosophical benefits testing and providing evidence for the empirical applicability of Merleau Ponty's aesthetic writings The central argument is that for Merleau Ponty the account of perception is also an account of art and vice versa In the philosopher's writings art and perception thus intertwine necessarily rather than contingently such that they can only be distinguished by abstraction As a result his account of perception and his account of art are organic interdependent and dynamic The contributors examine various aspects of this intertwining across different artistic media each ingeniously revealing an original perspective on this intertwining *Notions of "vernacular" in Architectural Writing in Britain Since 1839* Simon Unwin, 1990 **Architecture's Disability Problem** Wanda Katja Liebermann, 2024-06-21 Architecture's Disability Problem explores the intersection of architecture and disability in the United States from the perspective of professional practice This book uncovers why despite the profound effect of the Americans with Disabilities Act on the architectural profession there has been so little interest in design for disability in mainstream architecture To counter this the book investigates alternative approaches to designing with disability through three case studies These showcase both buildings and how design processes driven by disabled people shape design and professional roles Combining historical research formal and discourse analysis and interviews with people who design construct use buildings and advocate for access the book develops a social understanding of how the buildings work at functional affective and symbolic levels Architecture's Disability Problem is aimed at three primary readers practicing architects architectural scholars and members of disability scholar activist communities Grounded in detailed design studies the author hopes to unearth the social meaning making of architecture related to disability Ultimately the book makes an argument for a focus on disability in its own right as well as on the body in place of the dominance of formal object oriented approaches This book presents and argues for a fundamental shift in the way architectural education policy and practice views and engages with disability It will be key reading for students researchers practitioners and policy makers **The Figure of Knowledge** Sebastiaan Loosen, Rajesh Heynickx, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism

deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to *Technical Drawing 101 with AutoCAD 2020* Ashleigh

Fuller, Antonio Ramirez, Douglas Smith, 2019-06 *Technical Drawing 101* covers topics ranging from the most basic such as making freehand multiview sketches of machine parts to the advanced creating an AutoCAD dimension style containing the style settings defined by the ASME Y14.5 2009 Dimensioning and Tolerancing standard But unlike the massive technical drawing reference texts on the market *Technical Drawing 101* aims to present just the right mix of information and projects that can be reasonably covered by faculty and assimilated by students in one semester Both mechanical and architectural projects are introduced to capture the interest of more students and to offer a broader appeal The authors have also created extensive video training 120 videos 17 hours total that is included with every copy of the book In these videos the authors start off by getting students comfortable with the user interface and demonstrating how to use many of AutoCAD's commands and features The videos progress to more advanced topics where the authors walk students through completing several of the projects in the book The CAD portion of the text incorporates drafting theory whenever possible and covers the basics of drawing setup units limits and layers the tools of the Draw Modify and Dimension toolbars and the fundamentals of 3D modeling By focusing on the fundamental building blocks of CAD *Technical Drawing 101* provides a solid foundation for students going on to learn advanced CAD concepts and techniques paper space viewports xrefs annotative scaling etc in intermediate CAD courses In recognition of the diverse career interests of our students *Technical Drawing 101* includes projects in which students create working drawings for a mechanical assembly as well as for an architectural project We include architectural drawing because our experience has shown that many if not most first semester drafting students are interested in careers in the architectural design field and that a traditional technical drawing text which focuses solely on mechanical drawing projects holds little interest for these students The multidisciplinary approach of this text and its supporting materials are intended to broaden the appeal of the curriculum and increase student interest and it is hoped future enrollments

Folio 05: Documents on Nus Architecture Li Shiqiao, 2003 The fifth book in the Folio series features leading architects as they test out their ideas and designs among the students and staff of the National University of Singapore's Department of Architecture The ideas cover a range of issues including tropicalism dreams and architecture

Explorations in Urban Design Matthew Carmona, 2017-05-15 Whilst recognising that distinctly different traditions exist within the study and practice of urban design this book advances an interdisciplinary and innovative approach which is of direct importance to understanding the urban forms conditions practices and processes It enthuses and inspires users who

are grappling with urban design research problems but who need inspiration to move from idea to methodological approach Through the work of 32 urban researchers from the arts sciences and social sciences it demonstrates a wide range of problems and approaches and shows how the diverse range of complementary approaches can come together to provide a holistic understanding to the design of cities While each of the contributors presents a particular approach to researching the field sometimes focusing centrally on particular research methodologies others cutting across methods or focusing on theory all include discussion of actual research projects to illustrate their application to real world problems This book will be valuable to everyone from the informed undergraduate student about to embark on their first dissertation to PhD students and seasoned researchers immersed in methodological and conceptual complexity and wishing to compare available and appropriate methodological paths

This Thing Called Theory Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 22 White wide and scattered picturing her housing career 23 Toward a theory of Interior 24 Repositioning Theory now Don't excavate change reality Part VII Forms of engagement 25 Unpolitical 26 Prince complex narcissism and reproduction of the architectural mirror 27 Less than enough a critique of Aureli's project 28 Repositioning Having ideas 29 Post scriptum But that is not enough Index

The Contested Territory of Architectural Theory Elie G. Haddad, 2022-10-21 This book brings together a diverse group of theoreticians to explore architectural theory as a discipline assessing its condition and relevance to contemporary practice Offering critical assessment in the face of major social and environmental issues of today 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics gender representation race environmental crisis and history The chapters are grouped into two distinct sections the first section explores various historical perspectives on architectural theory mapping theory's historiographical turn and its emergence and decline from the 1960s to the present the second offers alternative visions and new directions for architectural theory incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David Leatherbarrow This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects
