Architectural Theory Taschen:

Architectural Theory Bernd Evers, 2003 This book charts the fascinating history of architectural theory from the Renaissance to the present day Addressing its subject country by country and featuring over 850 illustrations it offers a chronological overview of the most important architects and architectural theoreticians from Alberti to Koolhaas Book jacket

Architectural Theory. Pioneering Texts on Architecture from the Renaissance to Today Bernd Evers, 2025 Here are the most influential architectural essays written since the Renaissance copiously illustrated in a great book for anyone interested in what architects say about their craft Discover the theories behind the structures in which we live work and play from Alberti and Palladio to Le Corbusier and Koolhaas **Architectural Theory**, 2011 **Architectural Theory from**

the Renaissance to the Present Bernd Evers, 2003 Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2024-01-22 Building on the success of the first edition an engaging and reader friendly work on complex ideas Introducing Architectural Theory Expanding the Disciplinary Debate broadens the range of themes voices and geographies represented to provide a more comprehensive and contemporary theory book This book presents major discourses in architectural theory and design in a debate like format integrating a series of edited texts across architectural history with context and newly written commentaries by the authors This new edition has been fully revised updated and expanded to include long standing debates such as simplicity vs complexity or the relationship between form and function as well as newer discussions on innovation globalization and social equity Authors Smith and Guitart provide a comprehensive means and conceptual framework for readers to compare multiple points of view The chapter structure discussion questions and additional resources allow teachers to facilitate in class discussions and writing assignments This book remains the most accessible architectural theory textbook written for beginning architecture students and those outside the discipline Its reflective and critical approach will equally engage the minds of upper level students and experts **Interpretation in**

Architecture Adrian Snodgrass, Richard Coyne, 2013-05-13 Drawing on cultural theory phenomenology and concepts from Asian art and philosophy this book reflects on the role of interpretation in the act of architectural creation bringing an intellectual and scholarly dimension to real world architectural design practice For practising architects as well as academic researchers these essays consider interpretation from three theoretical standpoints or themes play edification and otherness Focusing on these the book draws together strands of thought informed by the diverse reflections of hermeneutical scholarship the uses of digital media and studio teaching and practice **The Scope of Architectural Theory** Jon

Lang, 2025-06-03 This book comprehensively lays out the knowledge base required for architectural practice and education at a time when artificial intelligence AI algorithms are shaping the way architects think Architects with a desire to retain their creative role in the design of buildings and urban spaces must understand and articulate the theoretical bases of their work and what it can achieve This book provides a clear structure and outline of both the functional and procedural theoretical

base for architects to employ in their work It offers an intellectually rigorous basis that allows architects to understand the evolution of architecture through history as well as the advocacies of individual architects It provides them with the scope of architectural theory necessary for designing for the future The book can be a valuable reference for researchers and professionals interested in architectural theory and allied fields *Introducing Architectural Theory* Korydon H. Smith,2012 Presents common architectural subjects as though they were conversations across history between theorists by providing you with the original text a reflective text and a philosophical text Le Corbusier, the Dishonest Architect Malcolm Millais,2018-01-23 This is not a book for architects but for all those that have suffered consciously and unconsciously from modern architecture and have wondered how it came about This was largely due to one man an architect called Le Corbusier For some he was a genius but the truth is he was a sham a fake a charlatan whose only gift was for self publicity He was the most influential architect of the second half of the twentieth century his influence overwhelmed the architectural profession on a global scale who swallowed his publicity whole and still hold him in awe For the rest of the world the mere mortals his influence was disastrous as traditional buildings were destroyed and replaced by featureless boxes of varying sizes imposing a dreariness hitherto unimagined As usual it was the poor who suffered most as they were herded into tower blocks These were often grouped into estates that ringed many towns and cities which then degenerated into high rise slums with all the well known attendant social problems This book exposes the myths that surround Le Corbusier detailing the endless failures of his proposals and his projects These were due to his profound dishonesty both as a person and as an architect His legacy was an architectural profession that believed and still believe they were designing buildings based on logic functionality and honesty whereas they were doing the opposite *An Introduction to Architectural Theory* Harry Francis Mallgrave,David J. Goodman,2011-03-16 A sharp and lively text that covers issues in depth but not to the point that they become inaccessible to beginning students An Introduction to Architectural Theory is the first narrative history of this period charting the veritable revolution in architectural thinking that has taken place as well as the implications of this intellectual upheaval The first comprehensive and critical history of architectural theory over the last fifty years surveys the intellectual history of architecture since 1968 including criticisms of high modernism the rise of postmodern and poststructural theory critical regionalism and tectonics Offers a comprehensive overview of the significant changes that architectural thinking has undergone in the past fifteen years Includes an analysis of where architecture stands and where it will likely move in the coming years The Visual Theology of the Huguenots Randal Carter Working,2016-02-18 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have explored in depth the relationship between Reformed theology and architectural forms This thesis explores the roots of Reformed aesthetics set against the background of late medieval church architecture The work of Serlio is demonstrably important in the spreading of the ideas of Vitruvius indicating the influence

of classical Roman building on French Reformed architecture There follows an examination of five important Huguenot architects Philibert de l Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret We then undergo a comparative examination of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings reveal the contribution of Huguenot architecture a distinct language that gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

Pulse, Code, Modulation
Kamal Spilsted,2014-11-14 This book was compiled due to a request from a university lecturer at Brighton University in the year which I think was 1998 I was at that time a student studying interior architecture and the request until now was never complete as I was never very good at meeting deadlines much to my detriment Anyway the question that was given to me was the difference between architecture and building a question that at that time I was unable to answer and still cant However in order to answer this question I embarked on a journey of research into the realms of architectural philosophy and writings which took many years as the more I read the more confused I became

Building Theories
Franca Trubiano,2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author

s fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de M zi res Boull e Laugier Rondelet Semper Viollet le Duc H bsch B tticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect s composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form
