Architecture With And Without Le Corbusier Jose Oubrerie Architecte:

Architecture with and Without Le Corbusier José Oubrerie, Paul Penney, 2012 Architecture with and Without Le Corbusier documents two architectural masterpieces the Church at Firminy and The Miller House The church is a late work by Le Corbusier that was left unfinished for 40 years Jos Oubrerie a protégé of the great master who had worked on the project from its inception completed and built the canonical work adapting it to current needs and standards while respecting the integrity of the original design The Miller House Oubrerie's own late masterpiece from the 90s is a landmark in Lexington where the architect devotes his mature years to academic leadership at the University of Kentucky It is firmly on its way to securing a permanent place in the modernist canon The thorough documentation of the two buildings with an extensive collection of previously unpublished drawings documents and photographs builds a precise and vivid testimony of Oubrerie's unique architectural trajectory with Le Corbusier's formidable legacy as a formative and creative influence The two seminal works presented side by side with commentary by George Ranalli and Kenneth Frampton yield insight into the evolution and current resonance of modernist architecture in a story that spans two worlds and two distinguished careers A collaboration between the City College of New York Bernard and Anne Spitzer School of Architecture and Oscar Riera Ojeda Publishers

The Architectural Detail Edward R. Ford, 2012-08-10 The Architectural Detail is author Edward R Ford's life's work and this may be his most important book to date Ford walks the reader through five widely accepted and wildly different definitions of detail in an attempt to find once and for all the quintessential definition of detail in architecture

Le Corbusier Stanislaus von Moos, 2009 Originally published in Germany in 1968 this first comprehensive and critical survey of Le Corbusier's life and work soon became the standard text on the architect and polymath French Spanish English Japanese and Korean editions followed but the book has now been out of print for almost two decades In the meantime Le Corbusier's archives in Paris have become available for research resulting in an avalanche of scholarship Von Moos' critical take and the basic criteria by which the subject is organized and historicized remain surprisingly pertinent in the context of this recent jungle of Corbusier studies This new completely revised edition is based on the 1979 version published in English by the MIT Press but offers a substantially updated body of illustrations Each of the seven chapters is supplemented by a critical survey of recent scholarship on the respective issues An updated edition of this acclaimed book an essential read for students of architecture and architectural history

The Le Corbusier Guide Deborah Gans, Le Corbusier, 2006 A picture may be worth a thousand words but there is no real substitute for personal experience and anyone who has visited Le Corbusier knows just how true this is This architectural guide tells you everything you need to know to get to his buildings including maps directions and visitor information

Architecture & Sustainable Development (vol.1) Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries

Le Corbusier,

1887-1965 Jean-Louis Cohen, 2004 Le Corbusier came of age at the time when cars and planes were becoming a common means of transportation thus he was one of the first professional architects to ply his trade on several continents at once This book brings together his finest work **Le Corbusier's Venice Hospital Project** Mahnaz Shah, 2017-05-15 While Le Corbusier's urban projects are generally considered confrontational in their relationship to the traditional urban fabric his proposal for the Venice hospital project remained an exercise in preserving the medieval fabric of the city of Venice through a systemic replication of its urban tissue This book offers a detailed study of Le Corbusier's Venice hospital project as a plausible built entity In addition it analyses it in the light of its supposed affinity with the medieval urban configuration of the city of Venice No formal attempt to date has been made to critically analyse the hospital project's design considerations in comparison to the medieval urban configuration of the city of Venice Using a range of methodologies including those from architectural theory and history using archival resources on site analysis and interviews with important resource persons this book is an interpretation of the conceptual basis for Le Corbusier's understanding of the structural formulation of the city of Venice as mentioned in *The Radiant City* 1935 In doing so it deciphers the diagrammatic analysis of the city structure found in this work into a set of coherent design modules that were applied in the hospital project and that could become a point of further investigation Architects and other architecturally interested laypeople with an interest in Venice will find the book a valuable addition to their knowledge For architectural historians the book makes an important link between modernism and the historically grown Venice *Modernity and the Construction of Sacred Space* Aaron French, Katharina Waldner, 2024-07-01 This volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces Not only language and ritual but space place and architecture play a significant role in constructing special or religious spaces However this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general This volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion space and architecture during the emergence of the modern period and up until contemporary times Revisiting the ways in which modern architects and artists have endeavored to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas especially those related to esotericism and to alternative religiosities have transformed the way sacred spaces are conceptualized today *The Development by Le Corbusier of the Design for L'Eglise de Firminy, a Church in France* Le Corbusier, 1964 [Historia crítica de la arquitectura moderna](#) Kenneth Frampton, 2024-04-02 Desde su primera edición en 1980 la *Historia crítica de la arquitectura moderna* de Kenneth Frampton se ha convertido en un clásico imprescindible dentro de la bibliografía académica sobre historia de la arquitectura moderna En esta quinta edición ampliamente revisada y actualizada el autor ha añadido una nueva y extensa sección que explora al detalle la evolución del Movimiento Moderno en la arquitectura en todo el mundo a finales del siglo xx y principios del xxi En ella se examinan las diversas formas en que los

arquitectos no solo responden a los contextos geográficos climáticos materiales y culturales sino que siguen también distintas líneas de enfoque en relación a la topografía la morfología la sostenibilidad y la forma cívica Le Corbusier in Detail Flora Samuel, 2007-08-31 This is the first book to give such close attention to Le Corbusier's approach to the making of buildings It illustrates the ways in which Le Corbusier's details were expressive of his overall philosophical intentions It is not a construction book in the usual sense rather it focusses on the meaning of detail on the ways in which detail informs the overall architectural narrative of a building Well illustrated and containing several specially prepared scaled drawings it acts as timely reminder to both students and architects of the possibilities inherent in the most small scale tectonic gestures

IAUS, the Institute for Architecture and Urban Studies Suzanne Frank, Suzanne Shulof Frank, 2010 The book is a combined memoir and impressionistic history of the Institute for Architecture and Urban Studies At first affiliated with New York's Museum of Modern Art and Cornell University the Institute housed architects artists and historians who worked on creative design and intellectual projects and would become world renown Its creation and direction was in the hands of its able leader Peter Eisenman Besides a documentary study of the work that went on there among an international clearing house the book is laced with impressions of the author's experience there It has been in the works for over 12 years and was originally financed by the Graham Foundation for the Study of the Fine Arts and has subsequently been aided by Dr Jenny Kaufmann The photographs of the Institute at the height of its activity are included and so does an original ground plan of its West 40th Street office done by Scott Brandt who also designed the book It ends with 27 interviews of prominent members of the Institute who comment on it and their experiences The book should appeal to architecture students and those interested in architecture and urbanism when the government in the United States was more reasonable in economic and political equity

The Architectural Model Matthew Mindrup, 2019-10-08 An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect's muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model's development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti's dictum that models be simple lest they distract

from the architect's ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup's histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways [The Architecture Book](#) DK,2023-01-19
