**Leading High-Performance School Systems** Marc Tucker, 2019-01-15 WITH A FOREWORD BY LINDA DARLING HAMMOND Did you know that close to

half of today's jobs in the U.S. could be done by robots and that proportion is rapidly increasing. It is quite possible that about half of today's high school graduates will not have the knowledge or skills needed to get a decent job when they graduate. Tomorrow's high school graduates will be able to thrive in this environment but only if school superintendents, central office executives, and principals use the strategies employed by the world's top performing education systems to build the high performance education systems of today. Students will need to succeed tomorrow. In *Leading High Performance School Systems: Lessons from the World's Best*, Marc Tucker, a leading expert on top performing school systems with more than 30 years of experience studying the global economy and education systems worldwide, details how top performing school systems have met head-on the challenges facing school leaders today. You'll learn why our current system is obsolete, explore the knowledge and skills needed to design and build first-rate education systems, and gain a solid understanding of the key elements of high performance school systems, including the following:

- A powerful, coherent instructional system with school-leaving certifications that mean much more than today's high school diploma.
- Partnerships with first-rate universities to ensure a steady supply of highly capable, well-educated and well-trained teachers.
- Schools reorganized around highly qualified professional teachers with a career ladder they can climb.
- High expectations and personalized support to ensure that children arrive at each grade level ready to learn.
- An equitable system that closes the gaps in student performance.
- Vocational education for talented youth seeking an applied, academically rigorous education.

*Leading High Performance School Systems* is an invaluable resource for school leaders preparing today's students for tomorrow's world. This book is a copublication of ASCD and NCEE.

**Empowered Educators in Canada** Carol Campbell, Ken Zeichner, Ann Lieberman, Pamela Osmond-Johnson, 2017-04-03

**BEST PRACTICES FROM CANADA'S HIGH PERFORMING SCHOOL SYSTEMS**

*Empowered Educators in Canada* is one volume in a series that explores how high performing educational systems from around the world achieve strong results. The anchor book *Empowered Educators: How High Performing Systems Shape Teaching Quality Around the World* is written by Linda Darling-Hammond and colleagues, with contributions from the authors of this volume. *Empowered Educators in Canada* details the core commonalities that exist across Canada, with special emphasis on the localized nature of the systems, a hallmark of Canadian education. Canada boasts a highly educated population, and the provinces/territories truly value education, as evidenced by the significant proportion of public funds allocated to schooling. Operated by the provinces and territories, participation in kindergarten, primary, and secondary education is close to 100% across the nation. In addition to offering traditional academics, secondary education includes opportunities for students to attend technical and vocational programs. To demonstrate exemplary education systems, the authors examine two top performing jurisdictions: Alberta and Ontario, which have developed strong supports for teacher development. Canadian teachers are highly qualified, and salary scales in all jurisdictions are typically based on a teacher's level of education and years of experience. While Canada has enjoyed much educational success, the education of First Nations students has

historically been one of the country's more controversial and contentious issues Overall Canada is a country that is proud of its education system and places a high value on and participation in publicly funded education **STEM Education:**
