

Covalent Bonding Practice: Molymod Lab Activity

Instructions:

- With your partner, get some molymod pieces from the stock in the middle of the room. You will need mostly black, white and red balls, about 5 of each. For the other colors 1 ball will probably be enough.
- Also get 6-8 of the short single bonds (gray plastic) and 4 of the longer, flexible double bonds (gray or purple plastic).
- Now work through the questions below, using your periodic table when needed.

Lab Questions

- 1) How many protons does hydrogen (H) have?
- 2) How many electrons does H have in its outer shell?
- 3) Is the outer shell of H full?
- 4) How many MORE electrons does H need to have a full shell? (Remember the "magic number" for H is different than for most other nonmetal elements)
- 5) In the molymod kit, H is the white ball or white cap. How many holes does the white ball/cap have?
