### Multiple Choice Questions

- Decide which of the choices **best** completes the statement or answers the question.
- Locate that question number on the separate answer sheet provided.
- Fill in the circle that corresponds to your choice.

*Use the following information to answer the next question.*

#### Ungulates

Ungulates, such as deer, reindeer, and elk, are hoofed mammals. These animals have keen hearing, clear vision, supple, well-conditioned muscles, and razor sharp reflexes. The evolution of the four-chambered stomach in ungulates developed as a result of a need to eat quickly in the open and chew later in the safety of cover. This process is called ruminating or "chewing the cud." In other words, ungulates regurgitate and then re-chew their food.

1. Which of the following would be considered a physiological (physical) adaptation of ungulates?
  - a. their ability to hibernate to avoid cold winters
  - b. their ability to stand perfectly still, which helps them avoid predators
  - c. their four-chambered stomach
  - d. their long legs, which help them outrun predators
2. What is an adaptation?
  - a. the ability of an organism to change
  - b. a change in an organism that allows it to survive and reproduce in its environment
  - c. a change in an organism that makes it unsuited to its environment
  - d. a change in an organism caused by a change in the environment
3. Define "Organic Evolution":
  - a. a change caused by a sudden change in local conditions such as a fire
  - b. a change that follows a predictable pattern such as marsh turning to meadow to a forest
  - c. a change of species over time
  - d. all of the above are correct

*Use the following information to answer the next question.*

materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents. *Glencoe Mathematics*, 2001
