celulei este a treia carte în care Siddhartha Mukherjee explorează ce înseamnă să fii om. Spre sfârșitul anilor 1600 un distins erudit englez Robert Hooke și un excentric negustor olandez de postavuri Antonie van Leeuwenhoek privesc prin microscopul lor artizanale și descoperă că organismele vii complexe sunt ansambluri de uniti minuscule autonome care se autoreglează. Fiecare parte din corpurile noastre este construită din aceste celule. Hooke le a botezat celule. Descoperirea celulelor și regândirea corpului uman ca un ecosistem celular anunță nașterea unui nou tip de medicină bazată pe manipulările terapeutice ale celulelor. Boli de o mare diversitate de la cancer la COVID pot fi toate privite ca rezultate ale funcționării anormale a sistemelor celulare, dar și ca efecte ale terapiilor celulare. În centrul celulei Mukherjee povestește cum au fost descoperite celulele și în ce fel biologia celulară conduce la crearea de tratamente noi și de oameni noi. Scrisă cu antrenamentul de a oferi o panoramă vie condimentată cu propria experiență a lui Mukherjee de cercetător medic și cititor pasionat, SIDDHARTHA MUKHERJEE este autorul cărților Gena O istorie fascinantă primul loc pe lista New York Times Bestsellers și numărul tuturor bolilor. O biografie a cancerului cîntă toată a Premiului Pulitzer în 2011 pentru domeniul nonficțional. Mukherjee este conferențiar universitar la Columbia University medic și cercetător în oncologie. Locuiește la New York cu soția și fiicele lor. Detalii pe website-ul personal SiddharthaMukherjee.com. Am început Centrul celulei cu o curiozitate moderată care s-a accentuat rapid pe măsură ce vedeam paginile ca și cum a fi citit o excelentă carte de suspans într-un limbaj prietenos analizând evoluția și fiziologia celulei cea mai simplă formă de viață cea din care suntem cu toții alături de Siddhartha Mukherjee ne năvălește cu uimire atât manifestări biologice am zice banale precum bătăile inimii în fapt o realizare miraculoasă de complexă a biologiei celulare cât și unele care par de domeniul literaturii SF precum folosirea celulelor cancerigene în proiectarea medicamentelor împotriva cancerului. Trecând prin povestea aspirinei sau a talomidei descoperirea FIV și a ingineriilor genetice antibiotice și anticorpi imunitate și memoria celulară și multe multe alte subiecte fascinante am avansat de la Din ce suntem făcuți la Cine suntem și apoi la Ce putem să facem din ceea ce suntem. Iar aici intervine ca întotdeauna tentația noastră demiurgică de a ne juca cu creația hybrisul și nemesisul nostru în acest moment încep să simtă apropierea de misterele tiinței la fel cum au simțit primii sapienți apropierea de sacru cu fascinație și groază deopotrivă. V-am spus doar că urmează să citiți o carte de suspans. Laura Clăușă Cu toții ne îmbolnăvim la un moment dat. Cu toții vom avea pe cineva drag cuprins de boală. Pentru a ne alege în acele momente ce se întâmplă și pentru a ne regăsi speranța într-o ameliorare e bine să ținem ceva despre celule. Aceste celule ale vieții. Cea mai recentă carte a lui Mukherjee vă oferă cunoștințele necesare. Oncolog și premiat cu Pulitzer, Mukherjee și-a investit toate talentele în această carte fantastică. Bill Gates Bine documentat Centrul celulei este un extraordinar periplu prin istoria descoperirii celei mai inovatoare forme de medicină celulară practică în prezent împreună cu promisiunile acestei abordări. Paul Nurse Premiul Nobel pentru fiziologie sau medicină 2001. Relatarea lui Mukherjee despre primele încercări din domeniul transplantului de măduvă și dă palpitații. Discuția despre celulele stem este excelentă. În ansamblu cartea este o odă închinată celulelor vizând structura și funcția lor trăsăturile lor comune diversitatea lor interconexiunile și posibilitățile lor nelimitate. Scriitura fiind marcată de un sentiment de mirare și
