Teratologies Jackie Stacey,2013-07-23 Stories of cancer are full of monster and marvels the monstrosity of the disease and the treatments the marvels of the cures and the saved lives Still one of the most dreaded diseases to haunt our imaginations cancer is more than an illness it is a cultural phenomenon People who have cancer are bombarded with competing explanations of their conditions it is genetically inherited it is environmentally produced it is the result of their personality Teratologies A Cultural Study of Cancer investigates how this disease is perceived experienced and theorised in contemporary society It explores changing beliefs about the causes of and the cures for cancer in both biomedicine and its increasingly popular alternative counterparts Analysing conventional and alternative medical accounts self help manuals and patients personal stories Jackie Stacey takes a critical look at the place of heroes metaphors the self and the body in these competing bids to produce the authoritative definition of the meaning of cancer today Interspersed with these detailed textual investigations are discussions of broader issues such as the feminist

debates about the history of science the place of consumer culture in health practices and the status of patients and of health professionals in postmodern society Combining autobiographical narratives with contemporary theoretical debates the author carves out a specifically feminist analysis of the cultural dimensions of cancer She brings accounts of her own illness under the critical lens of academic scrutiny and situates these personal stories within a discussion of contemporary cultural change

Workbook and Lab Manual for Sonography - E-Book Reva Arnez Curry,Marilyn Prince,2021-08-19 Review

important sonography learnings with Curry and Prince's Workbook for Sonography Introduction to Normal Structure and Function 5th Edition. This well-constructed review tool supports and completes the main text by providing an excellent introduction to sonography while preparing users to accurately identify sonographic pathology and abnormalities. Each workbook chapter opens with review questions on material from the corresponding chapter in the main text. Review questions are followed by drawings from the text with parallel sonograms where appropriate that include leader lines to label structures but not the labels themselves. Workbook users will fill in the labels to identify structures in the drawings and sonograms, reinforcing visual and auditory learning from the text. Answers can be looked up in both the workbook appendix and by comparing the workbook figures to the labeled figures in the main text. Unlabeled line drawings and images from every chapter provide reinforcement of what you should be noticing on the scan. Direct correlation with each chapter from the main text enables immediate thorough review of material. Review questions test your knowledge of the information learned in the text.

NEW Chapter on musculoskeletal sonography covers the latest use of ultrasound technology to visualize muscle, tendon, and ligament anatomy.

NEW Chapter devoted to pediatric sonography introduces you to the knowledge needed to work in this nascent specialty.

NEW Coverage of 5D technology familiarizes you with automated volume scanning.

NEW Updated content reflects the latest ARDMS standards and AIUM guidelines.

NEW Updated line drawings accompany new sonograms.
