**When the World was Black Part Two** Supreme understanding, 2013-02-02 When the World Was Black The Untold History of the World's First Civilizations Volume Two of The Science of Self series has been published in TWO parts Why two? Because there are far too many stories that remain untold We had over 200 000 years of Black history to tell from the southern tip of Chile to the northernmost isles of Europe and you can't do that justice in a 300 page book So there are two parts each consisting of 360 pages of groundbreaking history digging deep into the story of all the world's original people Part One covers the Black origins of all the world's oldest cultures and societies spanning more than 200 000 years of human history Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20 000 years up to the time of European contact Each part has over 100 helpful maps graphs and photos an 8 page full color insert in the center and over 300 footnotes and references for further research In this book you'll learn about the history of Black people I don't mean the history you learned in school which most likely began with slavery and ended with the Civil Rights Movement I'm talking about Black history BEFORE that Long before that In this book we'll cover over 200 000 years of Black history For many of us that sounds strange We can't even imagine what the Black past was like before the slave trade much less imagine that such a history goes back 200 000 years or more Part Two covers history from 20 000 years ago to the point of European contact This is the time that prehistoric cultures grew into ancient urban civilizations a transition known to historians as the Neolithic Revolution

**Covered in Ink** Beverly Yuen Thompson, 2015-07-24 Once associated with gang members criminals and sailors tattoos are now mainstream An estimated twenty percent of all adults have at least one and women are increasingly getting tattoos and are now more likely than men to have one But many of the tattoos that women get are gender appropriate they are cute small and can be easily

hidden A small dolphin on the ankle a black line on the lower back a flower on the hip and a child's name on the shoulder blade are among the popular choices But what about women who are heavily tattooed Why would a woman get sleeves And why do some collect larger scale tattoos on publicly visible skin of imagery not typically considered feminine or cute like skulls zombies snakes or dragons Drawing on five years of ethnographic research and interviews with more than seventy heavily tattooed women Covered in Ink provides insight into the increasingly visible subculture of tattooed women Author Beverly Yuen Thompson spent time in tattoo parlors and at tattoo conventions in order to further understand women's love of ink and their imagery choices as well as their struggle with gender norms employment discrimination and family rejection Still many of these women feel empowered by their tattoos and believe they are creating a space for self expression that also presents a positive body image Covered in Ink investigates this complicated subculture and finds out the many meanings of the love of ink Page 4 of cover

**Writing on the Body? Thinking Through Gendered Embodiment and Marked Flesh** Kay Inckle, 2009-03-26 This groundbreaking piece of work establishes a position of embodiment as an ethically salient epistemological and empirical strategy for understanding representing and experiencing gendered embodiment and marked flesh Developing an embodied feminist critique of the sociology of the body the author integrates this position with some of the most recent developments in qualitative methodologies and creative research practices in order to engage with and represent women's experiences of body marking As such the specific body practices which are addressed body modification and self injury are refigured in the context of a feminist embodied position This position of embodiment not only establishes a holistic non dualistic orientation from which to experience and explore gendered embodiment and body marking practices but in doing so also highlights the limitations of normative dualistic disembodied theories and methods which objectify and distance the very experiences they purport to explain Overall this exploration is a provoking moving and often uncomfortable

journey into the imperatives of gendered embodiment abject corporeality blood and pain and the practices which mark the body and evoke and transform the gendered embodied self This is a courageous beautifully written evocative and thought provoking book that takes the reader on an intimate journey into the misunderstood world of body marking practices As part of the journey Inckle provides a range of insights into the fluid ambiguous and complex forms of embodiment experienced by women over time The reflexive stance she adopts throughout enables the reader to chart her emerging awareness of methodological dilemmas and the inherent tensions she experiences in trying to resolve them in relation to feminist ethical positions As part of this process she challenges the norms of knowledge production and dissolves the disciplinary boundaries that frame much of the current debate on embodiment and body marking practices Inckle s findings offer a powerful critique of dominant research perspectives that focus on the body and she makes a strong case for the development of a feminist embodied sociology in the future As such this book will be of immense interest to sociologists and psychologists with an interest in the body and the dynamics of embodiment as well as to scholars seeking to develop their understanding of key methodological issues Professor Andrew C Sparkes PhD Exeter University This book is based on one of the best methodological approaches I have come across Supported by materials from a wide variety of disciplines it is reflexively argued and Dr Inckle charts new grounds in her trajectory from feminist methodologies to creative sociology searching for new ways of producing knowledge and radically broadening the sociological research agenda to include stories that come out of the body I particularly like the way Dr Inckle develops feminist research methodologies critiquing participatory approaches as often difficult to implement and the fearless yet highly problematic positioning of the researching I at the centre of the research process Dr Ronit Lentin Department of Sociology Trinity College Dublin
