*Fiscal Policy Shocks and Macroeconomic Growth in South Africa* Eliphas Ndou, Nombulelo Gumata, 2023-09-16 This book explores the disconnect between fiscal policy and macroeconomic development in South Africa. It analyses the factors that have contributed to the lack of economic growth in the country over recent decades and outlines an improved fiscal policy framework that increases investment and employment. Particular attention is given to the impact of government debt and its relationship with GDP, the connection between budget deficits and interest rates, and how economic policy uncertainty affects employment dynamics and inflation. This book provides practical fiscal policy suggestions to increase economic growth in South Africa and Africa more generally. It will be relevant to researchers and policymakers interested in African economics and economic policy.

**OECD Economic Surveys: South Africa 2015** OECD, 2015-07-17 This 2015 OECD Economic Survey of South Africa examines recent economic developments, policies, and prospects. Special chapters cover infrastructure and business regulation, tax policy, and inclusive growth.

**Nigeria-South Africa Relations and Regional Hegemonic Competence** Oluwaseun Tella, 2018-11-27 This book examines the relations between Nigeria and South Africa and their implications for regional influence across the African continent. With the largest and third largest economies in the region and a historical status as the major peacemakers on the continent, it is often argued that Africa's fate is directly linked to the success or failure of these regional powers. While there is widespread reference to each state's capabilities and regional influence in the extant literature, little analysis is offered on relations between Nigeria and South Africa and their impact on regional governance and provision of public goods on the continent. This book attempts to fill the gap by engaging issues such as the hegemonic competence of the states, their credentials for a permanent seat at the UNSC, their efforts towards regional integration, and their efforts towards combating the dark side of globalization, including climate change, drug trafficking, and xenophobia. It also engages a gender perspective to these states' relations, as well as their experiences of transitional justice. Providing an in-depth comparative analysis of the two so-called African powerhouses, this volume will be of interest to policy makers, academics, and students interested in Nigeria and South Africa's foreign policy, regional powerhood, and the African peace, security, and development agenda.

*Under Pressure: The Squeezed Middle Class* OECD, 2019-05-01 Middle class households feel left behind and have questioned the benefits of economic globalisation.

**How Governments Borrow** Ben Cormier, 2024-02-01 *How Governments Borrow* reveals how annual borrowing decisions are informed by domestic politics. The book traces the annual fiscal policymaking process in Emerging Markets (EM) to show how a government's partisan policy preferences are a primary determinant of annual external borrowing decisions and thus patterns of debt accumulation. That sovereign debt composition has partisan political roots provides insights for scholars in political science, international relations, economics, sociology, and public administration that work on sovereign debt. Sovereign debt composition enhances or limits the capacity of an EM government to contribute to social and economic development. Many EMs depend on foreign

currency debt How much external debt an EM government owes the cost of that debt the maturity of that debt and the conditions attached to that debt all determine the political and economic opportunities and risks associated with a government's borrowings EMs borrow from different sources each year leading them to build different sovereign debt structures over time Some prioritize cheap yet conditional official credit which constrains policy autonomy but enhances debt sustainability Others prioritize comparatively expensive bond markets which enhances policy autonomy but brings more expensive repayment obligations on to national balance sheets As countries accumulate debt the borrowing choices they make come to have important effects on fiscal space debt sustainability and development **Minerals Yearbook, 2010, V.**

**Developing Economies** Davide Furceri, Jun Ge, Mr. Prakash Loungani, Mr. Giovanni Melina, 2018-03-14 We construct unanticipated government spending shocks for 103 developing countries from 1990 to 2015 and study their effects on income distribution We find that unanticipated fiscal consolidations lead to a long lasting increase in income inequality while fiscal expansions lower inequality The results are robust to several measures of income distribution and size of the fiscal shocks to an alternative identification strategy across expansions and recessions and across country groups low income countries versus emerging markets An additional contribution of the paper is the computation of the medium term inequality multiplier This is on average about 1 in our sample meaning that a cumulative decrease in government spending of 1 percent of GDP over 5 years is associated with a cumulative increase in the Gini coefficient over the same period of about 1 percentage point The multiplier is larger for total government expenditure than for public investment and consumption with the former having larger effect likely due to the redistributive role of transfers Finally we find that unanticipated fiscal consolidations lead to an increase in poverty *Public Budgeting in African Nations* Peter Fuseini Haruna, Shikha Vyas-Doorgapersad, 2016-04-14

*Public Budgeting in African Nations* aims to provide usable budgeting and fiscal policy management information to development practitioners interested in improving the performance of governments in the context of good governance It shares regional and cross cultural experiences with international audiences and gives reflective attention to comparative budgeting and fiscal policy management With a promising economic and fiscal forecast such information is timely for

international development practitioners and for scholars and researchers interested in advancing development management This book adopts an interdisciplinary pragmatic approach to analyze and present research findings on public budgeting as a sustainable development tool The central argument is that development practice will benefit from a bottom up decentralized approach to budgeting and fiscal policy management involving national sub national and civil society institutions From this perspective a balanced budget should draw from and reflect values and priorities across the full spectrum of social and political life

[International Human Rights Law and Destitution](#) Luke Graham, 2022-08-18 This book explores destitution from the perspective of international human rights law and more specifically economic social and cultural rights The experience of destitution correlates to the non realisation of a range of economic social and cultural rights However destitution has not been defined from this perspective Consequently the nexus between destitution and the denial of economic social and cultural rights remains unrecognised within academia

and policy and practice This book expressly addresses this issue and in so doing renders the nexus between destitution and the non realisation of these rights visible The book proposes a new human rights based definition of destitution composed of two parts The rights which must be realised the component rights and the level of realisation of these rights which must be met the destitution threshold to avoid destitution This human rights based understanding of destitution is then applied to a UK case study to highlight the relationship between government policy and destitution to illustrate how destitution manifests itself and to make recommendations founded upon engendering the realisation of economic social and cultural rights aimed towards addressing destitution This book will have global and cross sectoral appeal to anti poverty advocates policy makers as well as to researchers academics and students in the fields of human rights law poverty studies and social policy
