A Slice Through Time Dendrochronology And Precision Dating:

A Slice Through Time M. G. L. Baillie, 2016-04-27 The dramatic development of European oak chronologies over the last ten years parallels and supplements the bristlecone pine chronology in the United States Dendrochronologists can now provide a wood sample a time capsule of biological material for any calendar date over the last seven millennia from two continents For archaeologists resigned to the imprecision of radiocarbon dating the implications are profound For the first time it is possible to establish precise dates for prehistoric events Similarly we have an independent and scientifically objective way of testing historical accounts such as the traditional Egyptian chronology Equally fundamental are the insights provided by the related disciplines of dendroecology and dendroclimatology The Bronze Age eruption of Santorini and the AD 540 event are explored as fascinating case studies Drawing on a further decade of research by himself and others Mike Baillie not only brings the pre 1980 story up to date but demonstrates the wide and exciting applications of this comparatively new science

Old English Runes Gaby Waxenberger, Kerstin Kazzazi, John Hines, 2023-04-03 This volume presents contributions to the conference Old English Runes Workshop organised by the Eichstätt München Research Unit of the Academy project Runic Writing in the Germanic Languages RuneS and held at the Catholic University of Eichstätt Ingolstadt in March 2012 The conference brought together experts working in an area broadly referred to as Runology Scholars working with runic objects come from several different fields of specialisation and the aim was to provide more mutual insight into the various methodologies and theoretical paradigms used in these different approaches to the study of runes or in the present instance more specifically runic inscriptions generally assigned to the English and or the Frisian runic corpora Success in that aim should automatically bring with it the reciprocal benefit of improving access to and understanding of the runic evidence expanding and enhancing insights gained within such closely connected areas of study of the Early Mediaeval past

Archaeology: The Basics Clive Gamble, 2007-08-07 This second edition from our successful Basics series presents another chance to delve into this increasingly popular subject Fully updated Archaeology The Basics has been revised to reflect

growth in areas such as material culture human evolution and the political use of the past Lively and engaging some of the key questions answered include What are the basic concepts of archaeology How and what do we know about people and objects from the past What makes a good explanation in archaeology How do we know where to look From everyday examples to the more obscure this is essential reading for all students independent archaeologists and indeed all those who want to know more about archaeological thought history and practice A piece of broken pottery will never seem the same again

Archaeological Artefacts as Material Culture Linda Hurcombe, 2014-05-12 This book is an introduction to the study of artefacts setting them in a social context rather than using a purely scientific approach Drawing on a range of different cultures and extensively illustrated Archaeological Artefacts and Material Culture covers everything from recovery strategies and recording procedures to interpretation through typology ethnography and experiment and every type of material including wood fibers bones hides and adhesives stone clay and metals With over seventy illustrations with almost fifty in full colour this book not only provides the tools an archaeologist will need to interpret past societies from their artefacts but also a keen appreciation of the beauty and tactility involved in working with these fascinating objects This is a book no archaeologist should be without but it will also appeal to anybody interested in the interaction between people and objects

Eruptions that Shook the World Clive Oppenheimer, 2011-05-26 What does it take for a volcanic eruption to really shake the world Did volcanic eruptions extinguish the dinosaurs or help humans to evolve only to decimate their populations with a super eruption 73 000 years ago Did they contribute to the ebb and flow of ancient empires the French Revolution and the rise of fascism in Europe in the 19th century These are some of the claims made for volcanic cataclysm Volcanologist Clive Oppenheimer explores rich geological historical archaeological and palaeoenvironmental records such as ice cores and tree rings to tell the stories behind some of the greatest volcanic events of the past quarter of a billion years He shows how a forensic approach to volcanology reveals the richness and complexity behind cause and effect and argues that important lessons for future catastrophe risk management can be drawn from understanding events that took place even at the dawn of human origins

The Climate in Historical Times Hubertus Fischer, Thomas Kumke, Gerrit Lohmann, Heinrich Miller, Jorg Negendank, 2013-03-14 An Introduction to the KIHZ Project The description of the climate system and the quantification of its natural variability and dynamics is essential to assess an ongoing anthropogenic climate change and to validate climate and biogeochemical models to allow for reliable projections into the future Because the spatio temporal coverage of direct meteorological observations is rather limited high resolution and absolutely dated climate archives represent the only key to a quantification of seasonal to millennial climate variations in the past Furthermore climate models provide insights into the major processes and causes relevant for climate variability on these time scales Both approaches represent one side of the same medal however melting both sides down to one combined effort is often hampered by obstacles defined by the different nature of the approaches For instance General Circulation Models GCMs per se deal

with spatially resolved data representing real climate variables in the model world such as temperature or precipitation with each model run reflecting one possible realization of climate history under given boundary conditions In contrast the records of natural climate archives are influenced by climate variations as they took place in reality however are often representative of local climate conditions only Moreover the climate information deduced from natural archives is in nearly all cases based on climate proxies whose relationship to real climate variables the so called transfer function has to be established beforehand

European Prehistory Sarunas Milisauskas, 2011-08-04 *European Prehistory A Survey* traces humans from their earliest appearance on the continent to the Rise of the Roman Empire drawing on archaeological research from all over Europe It includes the Paleolithic Mesolithic Neolithic Bronze and Iron Ages Throughout these periods the major developments are explored using a wide range of archaeological data that emphasizes aspects of agricultural practices gender mortuary practices population genetics ritual settlement patterns technology trade and warfare Using new methods and theories recent discoveries and arguments are presented and previous discoveries reevaluated This work includes chapters on European geography and the chronology of European prehistory A new chapter has been added on the historical development of European archaeology The remaining chapters have been contributed by archaeologists specializing in different periods The second edition of *European Prehistory A Survey* is enhanced by a glossary three indices and a comprehensive bibliography as well as an extensive collection of maps chronological tables and photographs

Climate Change William James Burroughs, 2007-11-15 Providing a concise up to date presentation of current knowledge of climate change and its implications for society as a whole this new edition has been thoroughly updated and extended to include the latest information The text describes the components of the global climate considers how the many elements of climate combine to define its behaviour and reviews how climate change is measured The author discusses how the causes of climate change can be related to the evidence of change and modelled to predict future changes This book is ideally suited for introductory courses in meteorology oceanography environmental science earth science geography agriculture and social science It contains review questions at the end of each chapter to enable readers to monitor their understanding of the materials covered This book should appeal to an audience with a keen interest in all aspects of the climate change debate

Past Climate Variability through Europe and Africa Richard W. Battarbee, Françoise Gasse, Catherine E. Stickley, 2004-12-03 This book focuses on two complementary time scales the Holocene approximately the last 11 500 years and the last glacial interglacial cycle approximately the last 130 000 years to synthesize evidence of climate variability at the regional and continental scale across Europe and Africa This is the first examination of historical climate variations at such a scale and thus sets a benchmark for future research

Lifespan David A. Sinclair, Matthew D. LaPlante, 2019-09-10 A NEW YORK TIMES BESTSELLER Brilliant and enthralling The Wall Street Journal A paradigm shifting book from an acclaimed Harvard Medical School scientist and one of Time s most influential people It s a seemingly undeniable truth that aging is

inevitable But what if everything we've been taught to believe about aging is wrong What if we could choose our lifespan In this groundbreaking book Dr David Sinclair leading world authority on genetics and longevity reveals a bold new theory for why we age As he writes Aging is a disease and that disease is treatable This eye opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations revealing incredible breakthroughs many from Dr David Sinclair's own lab at Harvard that demonstrate how we can slow down or even reverse aging The key is activating newly discovered vitality genes the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger but actually become younger Through a page turning narrative Dr Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes such as intermittent fasting cold exposure exercising with the right intensity and eating less meat that have been shown to help us live younger and healthier for longer At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind Lifespan will forever change the way we think about why we age and what we can do about it

The End of Eden Graham Phillips, 2007-05-29 Presents compelling evidence that civilizations worldwide became warlike and monotheistic after Earth passed through the tail of a comet in 1500 B C Explores the violent effect of debris from comet 12P Pons Brooks on peaceful cultures such as the Olmec of Mexico and the Megalithic people who built Stonehenge Shows how this comet's appearance was taken as a significant religious event that still has repercussions today In the year 2024 the comet 12P Pons Brooks is due to pass near Earth again for the first time in 3 500 years In 1500 B C Earth passed through this comet's tail and in the decade following cultures the world over began to exhibit significant aggressive tendencies Civilizations in India the Middle East China Japan Europe and Central America suddenly abandoned their peaceful ways and devoted themselves with uncharacteristic fervor to making war on their neighbors and fighting among themselves But this was not the only effect that is linked to this celestial event Sudden outbreaks of monotheism the worship of a single god and a new idea at the time occurred simultaneously in locales spread widely throughout the world Most of these monotheistic religions represented their god symbolically as a circle with a series of lines extending below resembling a simple drawing of a comet In *The End of Eden* Graham Phillips chronicles the sudden shifts in social demeanor and religious philosophy that swept the world in the wake of 12P Pons Brooks He argues that there is no other explanation for these changes other than the presence of this massive comet in the skies above Earth He contends that debris in the comet's tail contaminated the atmosphere with a chemical known to cause aggressive behavior and that after little more than a decade worldwide hostility abruptly abated He also explores how the appearance of a celestial body that outshone the moon would have been interpreted as a significant religious event the premier appearance of a powerful new god to supplant the deities previously worshipped around the world *Crossing the Borders* Corinne L. Hofman, Menno L. P. Hoogland, Annelou L. van

European Societies in the Bronze Age A. F. Harding, 2000-05-18 The Bronze Age roughly 2500 to 750 BC was the last fully prehistoric period in Europe and a crucial element in the formation of the Europe that emerged into history in the later first millennium BC This book focuses on the material culture remains of the period and through them provides an interpretation of the main trends in human development that occurred during this timespan It pays particular attention to the discoveries and theoretical advances of the last twenty years that have necessitated a major revision of received opinions about many aspects of the Bronze Age Arranged thematically it reviews the evidence for a range of topics in cross cultural fashion defining which major characteristics of the period were universal and which culture and area specific The result is a comprehensive study that will be of value to specialists and students while remaining accessible to the non specialist

Weather Cycles William James Burroughs, 2003-12-24 This completely updated new edition of *Weather Cycles* Real or Imaginary explores in detail the unresolved debate on the existence of weather cycles The book examines the competing arguments for observed effects being due to natural variability solar activity and the Earth's orbital parameters It provides a different perspective on one of the most difficult questions in the current global warming debate namely just how much of the recent temperature rise can be attributed to natural causes Only by understanding how the climate can change of its own

accord and whether observed shifts are part of a set of predictable patterns will it be possible to reach a reliable judgement on how much impact human activities are having This book examines the complex analysis required to assess the evidence for cycles with a minimum of mathematics This comprehensive and balanced account will appeal to the student and expert alike
