Power

This front panel button will manually switch the AMP Three on or off. A multicolored LED indicates its power status. To use the *Auto On* feature, leave this front panel switch in the on position.

Speaker Selector

The AMP Three has two pairs of speaker outputs. Press button *A* to activate the *A* outputs. Press button *B* to activate the *B* outputs. Both *A* and *B* outputs may be used simultaneously provided the combined impedance does not fall below 2 ohms.

Note: Before pressing either of the speaker selector buttons, be sure that the level controls are set at the minimum position.

Input Level Controls

These knobs adjust the incoming signal level and thereby act as volume controls. We recommend that these be set to *max* and your signal source (receiver, CD player, preamplifier, etc.) be used to adjust the volume.
