A Textbook Of Translation Theoretical And Practical Implications:

Translation Said M. Shiyab, 2017 This book introduces students to the theory and practice of translation It also examines issues that are often debated such as the concept of meaning translation as an art or science fallacies of translation and translation rules and ethics Chapters in this book can be used to teach any course introducing students to the field of translation One of the distinguishing features is that there is a set of questions found at the end of each chapter that tests the student's knowledge of the information covered In addition some relevant texts are provided for students to translate into the target language something that is hardly ever found in textbooks on translation In addition the book introduces legal and scientific translation and offers real life examples that have been carefully selected for classroom practice Series ATI Academic Publications Vol 8 Subject Translation Linguistics Literary Studies *The Influence of Translation on the Arabic Language* Mohamed Siddig Abdalla, 2018-10-19 This book explores the influence of translation on the Arabic language with particular emphasis on the translation of English idioms by journalists working at Arabic satellite TV stations using a mixed method approach quantitative and qualitative It begins from a belief that the impact of broadcast media on Arabic speakers is more instant wider and farther reaching than that caused or triggered by any other branch of mass media as not all features of television appear in other media The book focuses on idioms because of the difficulties associated with translating them and also because the literature review revealed inadequacy in understanding this intriguing part of the development of the Arabic language In contrast to other similar titles the book examines the possible factors causing journalists to resort to idiom literalisation including those relating to demographic characteristics The main significance of this book is that it has practical implications for its potential audience both practitioners and professional peers It provides information to enable media translators and lexicographers to become more sensitive towards the logico semantic relationships present in idiomatic expressions and to improve their application of idiomatic expressions in their translations Overall the results presented here will serve to guide media translators and lexicographers choice in the usage of idioms to produce better quality translations and dictionaries This insight is important not only to translators and lexicographers but also to language teachers and students of translation Pedagogically the findings of the current book will encourage translation teachers to reconsider their strategies for teaching English idioms Students of translation and English language learners in general will also benefit from the results of this book

New Theory of the Holy Qur'an Translation: A Textbook for Advanced University Students of Linguistics and Translation Ali Alhaj, 2015-06 Translation strategies are the procedures employed by the translator to attempt a solution to the multifarious baffling problems with which translation is indubitably replete Malone 1988 p 78 defines translation The steps selected from a consciously known range of potential procedures taken to solve a translation problem which has been consciously detected and resulting in a consciously applied solution While some strategies are helpful others turn out to be of little avail It follows then that the translator has to sort out the wheat from the chaff in pursuit of a good translation Here the translator may utilize particular strategies in accordance with the method anticipated in the course of translation i e target orientedness or source orientedness Faced with differences in the extralinguistic reality of the two cultures or ist lexical mapping the translator tries to reconcile them by relying on the following procedures borrowing definition literal translation substitution lexical creation omission and addition Three comments that need to be made by the researcher in connection with this list First not all of the procedures achieve cultural transfer in the sense of filling the gap but they all serve the purpose of achieving communicative equivalence in translation For instance substitution and omission certainly do not help to make members of the target culture aware of anything that their culture does not already possess and lexical creation is no more enlightening than the use of the sources language expression unless accompanied by some other procedure that will make the particular extra linguistic feature part of their experiences Second combinations of procedures rather than single procedures are required for optimum transmission of cultural information e g borrowing and definition borrowing and substitution lexical creation and definition Third in planning

his/her translation strategy the translator does not make a one-time decision on how he/she will treat unmatched elements of culture rather even if the translator has established an overall order of preferences he/she usually makes a new decision for each element and for its each use in an act of communication rather even if he has established an overall order of preferences he usually makes a new decision for each such element and for each use in an act of communication Cohen 1990 p 78
