

Chapter 9

Materiality and Risk

■ Review Questions

9-1 The parts of planning are: accept client and perform initial planning, understand the client's business and industry, assess client business risk, perform preliminary analytical procedures, set materiality and assess acceptable audit risk and inherent risk, understand internal control and assess control risk, gather information to assess fraud risk, and develop overall audit plan and audit program. Evaluation of materiality is in the fifth part of planning. Risk assessment is in part three (client business risk), part five (acceptable audit risk and inherent risk), part six (control risk), and part seven (fraud risk).

9-2 Materiality is defined as: the magnitude of an omission or misstatement of accounting information that, in light of the surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

"Obtain reasonable assurance," as used in the audit report, means that the auditor does not guarantee or insure the fair presentation of the financial statements. There is some risk that the financial statements contain a material misstatement.

9-3 Materiality is important because if financial statements are materially misstated, users' decisions may be affected, and thereby cause financial loss to them. It is difficult to apply because there are often many different users of the financial statements. The auditor must therefore make an assessment of the likely users and the decisions they will make. Materiality is also difficult to apply because it is a relative concept. The professional auditing standards offer little specific guidance regarding the application of materiality. The auditor must, therefore, exercise considerable professional judgment in the application of materiality.

9-4 The preliminary judgment about materiality is the maximum amount by which the auditor believes the financial statements could be misstated and still not affect the decisions of reasonable users. Several factors affect the preliminary judgment about materiality and are as follows:

1. Materiality is a relative rather than an absolute concept.
2. Bases are needed for evaluating materiality.
3. Qualitative factors affect materiality decisions.
