A History of Science and Technology 1 R. J. Forbes,1963 **A History of Science and Technology. Vol. 1** R. J. Forbes,E. J. Dijksterhuis,1963 *Early Physics and Astronomy* Olaf Pedersen,1993-03-11 The book describes how the scientific account of the world arose among the Greeks and developed in the Middle Ages **The Heavenly Writing** Francesca Rochberg,2004-09-27 In antiquity the expertise of the Babylonians in matters of the heavens was legendary and the roots of both western astronomy and astrology are traceable in cuneiform tablets going back to the second and first millennia BC The Heavenly Writing first published in 2004 discusses the place of Babylonian celestial divination horoscopy and astronomy in Mesopotamian intellectual culture Focusing chiefly on celestial divination and horoscopes it traces the emergence of personal astrology from the tradition of celestial divination and the use of astronomical methods in horoscopes It further takes up the historiographical and philosophical issue of the nature of these Mesopotamian celestial sciences by examining elements traditionally of concern to the philosophy of science without sacrificing the ancient methods goals and interests to a modern image of science This book will be of particular interest to those concerned with the early history of science *A History of Science and Technology 1* R. J. Forbes,E. J. Dijksterhuis,1963 **A Guide to the Sources of**

British Military History Robin Higham,2015-10-05 Designed to fill an overlooked gap this book originally published in 1972 provides a single unified introduction to bibliographical sources of British military history Moreover it includes guidance in a number of fields in which no similar source is available at all giving information on how to obtain access to special collections and private archives and links military history especially during peacetime with the development of science and technology

Restoration England 1660-1689 William Lewis Sachse,1971-07-02 [English Literature of the Late Seventeenth Century](#) James Runciman Sutherland,1969 [Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures](#) Helaine Selin,2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin,1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a transmogrifier of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to

legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa

Risk Evaluation and Management V.T. Covello, Joshua Menkes, J.L. Mumpower, 2012-12-06 Public attention has focused in recent years on an array of technological risks to health safety and the environment At the same time responsibilities for technological risk assessment evaluation and management have grown in both the public and private sectors because of a perceived need to anticipate prevent or reduce the risks inherent in modern society In attempting to meet these responsibilities legislative judicial regulatory and private sector institutions have had to deal with the extraordinarily complex problems of assessing and balancing risks costs and benefits The need to help society cope with technological risks has given rise to a new intellectual endeavor the social and behavioral study of issues in risk evaluation and risk management The scope and complexity of these analyses require a high degree of cooperative effort on the part of specialists from many fields Analyzing social and behavioral issues requires the efforts of political scientists sociologists decision analysts management scientists economists psychologists philosophers and policy analysts among others

Leibniz's Correspondence in Science, Technology and Medicine (1676 -1701) James O'Hara, 2024-07-29 Leibniz's correspondence from his years spent in Paris 1672-1676 reflects his growth to mathematical maturity whereas that from the years 1676-1701 reveals his growth to maturity in science technology and medicine in the course of which more than 2000 letters were exchanged with more than 200 correspondents The remaining years until his death in 1716 witnessed above all the appearance of his major philosophical works The focus of the present work is Leibniz's middle period and the core themes and core texts from his multilingual correspondence are presented in English from the following subject areas mathematics natural philosophy physics and cosmology power technology including mining and transport engineering and engineering science projects scientific technological and economic projects alchemy and chemistry geology biology and medicine
