A Subtle Sort Of Genocide:

Tatty, I Have a Lawyer, 1998 The Origins of Genocide Dominik J. Schaller, Jürgen Zimmerer, 2013-09-13 This year the United Nations celebrated the Convention on the Prevention and Punishment of the Crime of Genocide adopted in December 1948 It is time to recognize the man behind this landmark in international law At the beginning were a few words New conceptions require new terms By genocide we mean the destruction of a nation or of an ethnic group Rarely in history have paradigmatic changes in scholarship been brought about with such few words Putting the quintessential crime of modernity in only one sentence Raphael Lemkin 1900 1959 the Polish Jewish specialist in international law not only summarized the horrors of the National Socialist Crimes which were still underway when he coined the term genocide in 1944 but also influenced international law As the founding figure of the UN Genocide Convention Lemkin is finally getting the respect he deserves Less known is his contribution to historical scholarship on genocide Until his death Lemkin was working on a broad study on genocides in the history of humankind Unfortunately he did not manage to publish it The contributions in this book offer for the first time a critical assessment not only of his influence on international law but also on historical analysis of mass murders showing the close connection between both This book was published as a special issue of the Journal of Genocide Research *Every Living Thing* Jenell Johnson, 2023-01-03 This book examines the question of what we mean when we talk about life revealing new insights into what life is what it does and why it matters Jenell Johnson studies arguments on behalf of life not just of the human or animal variety but all life She considers for example the Standing Rock Sioux tribe's fight for water deep ecologists Earth First activism the Voluntary Human Extinction Movement and astrophysicists positions on Martian microbes What she reveals is that this advocacy vital advocacy expands our view of what counts as life and shows us what it would mean for the moral standing of human life to be extended to life itself Including short interviews with celebrated ecological writer Dorion Sagan former NASA Planetary Protection Officer Catharine Conley and leading figure in Indigenous and environmental studies Kyle Whyte *Every Living Thing* provides a capacious view of life in the natural world This book is a must read for anyone interested in biodiversity bioethics and the environment **Out of the Revolution** Delores P. Aldridge, Carlene Young, 2000-11-01 The introduction of Black studies programs into institutions of higher education was a direct response to the mandate for change at all levels that characterized the civil rights movement and the social rebellions of the 1950s and 1960s In *Out of the Revolution* Delores P Aldridge and Carlene Young collect thirty one of the nation's top scholars to provide a complete reference for understanding the impetus for the development of and future considerations for the discipline of Africana studies Topics addressed include epistemological considerations humanistic perspectives the role of bureaucracy and the academic institution the social psychological political and economic dimensions the position of black women in the field and how the discipline has empowered the black student This invaluable resource for educators and students alike concludes with a look at graduates in Africana studies and their careers and a

discussion of the future of the field New Directions in Genocide Research Adam Jones,2012-03-12 This edited book seeks to capture the range of new approaches theories and case studies in the field of genocide studies Genocide as Social Practice Daniel Feierstein,2014-05-14 Genocide not only annihilates people but also destroys and reorganizes social relations using terror as a method In *Genocide as Social Practice* social scientist Daniel Feierstein looks at the policies of state sponsored repression pursued by the Argentine military dictatorship against political opponents between 1976 and 1983 and those pursued by the Third Reich between 1933 and 1945 He finds similarities not in the extent of the horror but in terms of the goals of the perpetrators The Nazis resorted to ruthless methods in part to stifle dissent but even more importantly to reorganize German society into a Volksgemeinschaft or people s community in which racial solidarity would supposedly replace class struggle The situation in Argentina echoes this After seizing power in 1976 the Argentine military described its own program of forced disappearances torture and murder as a process of national reorganization aimed at remodeling society on Western and Christian lines For Feierstein genocide can be considered a technology of power a form of social engineering that creates destroys or reorganizes relationships within a given society It influences the ways in which different social groups construct their identity and the identity of others thus shaping the way that groups interrelate Feierstein establishes continuity between the reorganizing genocide first practiced by the Nazis in concentration camps and the more complex version complex in terms of the symbolic and material closure of social relationships later applied in Argentina In conclusion he speculates on how to construct a political culture capable of confronting and resisting these trends First published in Argentina in Spanish *Genocide as Social Practice* has since been translated into many languages now including this English edition The book provides a distinctive and valuable look at genocide through the lens of Latin America as well as Europe **International Crimes** Guénaél Mettraux,2019 This book discusses in detail the law of genocide its definition elements normative status and relationship to the other core international crimes It is the first in a four volume compendium from Judge Mettraux on the four core international crimes *Genocide* ,2020-12-15 In 1948 the United Nations established the Genocide Convention to legally define genocide as actions intended to destroy a particular group of people based on race religion ethnicity and other defining characteristics The goal was to prevent and punish future acts of genocide but a number of mass killings have followed since its establishment and in some situations whether these executions qualify as genocides is surprisingly unclear The viewpoints in this volume explore what genocide is and isn t and provide historical and contemporary examples of genocide Readers will examine potential political and social solutions to prevent future genocides
