Sharing Breath Sheila Batacharya, Yuk-Lin Renita Wong, 2018-10-31 Treating bodies as more than discursive in social research can feel out of place in academia As a result embodiment studies remain on the outside of academic knowledge construction and critical scholarship However embodiment scholars suggest that investigations into the profound division created by privileging the mind intellect over the body spirit are integral to the

project of decolonization The field of embodiment theorizes bodies as knowledgeable in ways that include but are not solely cognitive The contributors to this collection suggest developing embodied ways of teaching learning and knowing through embodied experiences such as yoga mindfulness illness and trauma Although the contributors challenge Western educational frameworks from within and beyond academic settings they also acknowledge and draw attention to the incommensurability between decolonization and aspects of social justice projects in education By addressing this tension ethically and deliberately the contributors engage thoughtfully with decolonization and make a substantial and sometimes unsettling contribution to critical studies in education **Assessment in Perspective** Clare Landrigan, Tammy Mulligan, 2013

Assessment is an integral part of instruction For the past decade the focus on assessment particularly via high stakes mandated tests has shifted away from the classroom and left teachers feeling like they are drowning in data Assessment is and needs to be again much more than a number Assessment in Perspective is about moving beyond the numbers and using assessment to find the stories they tell This book helps teachers sort through the myriad of available assessments and use each to understand different facets of their readers It discusses how to use a range of assessment types from reading conference notes and student work to running records and state tests together to uncover the strengths and weaknesses of a reader The authors share a framework for thinking about the purpose method and types of different assessments They also address the questions they ask when choosing or analyzing assessments What type of tool do we need diagnostic formative or summative formal or informal quantitative or qualitative How do we use multiple assessments together to provide an in depth picture of a reader When and how are we giving the assessment Do we want to be able to compare our readers to a standard score or do we need to diagnose a reader s needs Which area of reading does this tool assess How can we use the information from assessments to inform our instruction What information does a particular assessment tell us and what doesn t it tell us What additional information do we need about a reader to understand his or her learning needs The book emphasizes the importance of triangulating data by using varied sources both formal and informal and across multiple intervals It explains the power of looking at different types of assessments side by side with displays to find patterns or inconsistencies What s more students are included as valuable sources of data Letting students in on the process of assessment is key to helping them set goals monitor their own progress and celebrate growth When assessment is viewed in this way instruction can meet high standards and still be developmentally appropriate **The Emperor Has No Clothes**

Tema Okun, 2010-10-01 The Emperor Has No Clothes Teaching About Race and Racism to People Who Don t Want to Know offers theoretical grounding and practical approaches for leaders and teachers interested in effectively addressing racism and other oppressive constructs The book draws both on the author s extensive experience teaching about race and racism in classroom and community settings and from the theory and practice of a wide range of educators activists and researchers committed to social justice The first chapter looks at the toxic consequences of our western cultural insistence on profit

binary thinking and individualism to establish the theoretical framework for teaching about race and racism Chapter two investigates privileged resistance offering a psycho social history of denial particularly as a product of racist culture Chapter three reviews the research on the construction and reconstruction of dominant culture both historically and now in order to establish sound strategic approaches that educators teachers facilitators and activists can take as we work together to move from a culture of profit and fear to one of shared hope and love Chapter four lays out the stages of a process that supports teaching about racist white supremacy culture explaining how students can be taken through an iterative process of relationshipbuilding analysis planning action and reflection The final chapter borrows from the brilliant brave and incisive writer Dorothy Allison to discuss the things the author knows for sure about how to teach people to see that which we have been conditioned to fear knowing The chapter concludes with how to encourage and support collective and collaborative action as a critical goal of the process
