*Plurihistoricity* Zoltán Boldizsár Simon, 2025-07-25 This book situates historical scholarship within a plurihistoricity of contemporary historical culture exploring conflicting conceptions of historical change in technological utopias of human enhancement in prospects of human extinction in societal responses to the Anthropocene and in the imperative of bringing colonial patterns of historical injustice to justice Contemporary societies increasingly reclaim history from the academic pursuit of historiography On the one hand societal engagement in history is growing palpably History is literally everywhere in the fallen statues of past political regimes in trajectories of environmental degradation and in technological prospects of space expansion On the other hand societal demand for history seems to diminish rather than strengthen the authority of professionalized historical studies What do these societal historicities stand for How do they create pasts that matter What futures do they desire or attempt to avoid How do they view the historical transitions into those futures And what is the societal role of historical scholarship and scholarly conceptions of history in the plurihistoricity of contemporary historical culture By addressing these questions Simon s book is essential reading for everyone interested in the present and future of viewing the world historically

Countdown Alan Weisman, 2013-09-24 Every four days there are a million more people on the planet More people and fewer resources In this timely work Alan Weisman examines how we can

shrink our collective human footprint so that we don't stomp any more species including our own out of existence. The answer: reducing gradually and non-violently the number of humans on the planet whose activities, industries, and lifestyles are damaging the Earth. Defining an optimum human population for the Earth is an explosive concept. Weisman, one of the most brilliant environmental writers, will travel the globe from the settlements of Israel and the plains of Mexico to the bustling streets of Pakistan and the teeming cities of the UK. In his search for answers, he will speak to religious leaders, demographers, ecologists, economists, engineers, and agriculturalists in what promises to be an international classic.

### **Before Humanity**

Stefan Herbrechter, 2021-12-13. *Before Humanity* takes up the question of the post in the posthuman from the position of ancestrality. Speculating about who or what comes after the human inevitably throws us back to our very beginnings. The 'before' in *Before Humanity* in this context takes on two meanings: 1) what happened before we apparently became human, which translates into a critical reading of paleo-anthropology as well as evolutionary narratives of hominization; 2) living through the end of a certain humanist anthropocentric notion of humanity, what tasks lie before us, which provokes a critical reading of the Anthropocene and current narratives of geologization. In other words, *Before Humanity* investigates conceptualizations of humanity and asks whether we have ever been human and, if not, what could or maybe what should we have been.

*Environment and Society* Christopher Schlottmann, Dale Jamieson, Colin Jerolmack, Anne

Rademacher, 2017-01-24. *Environment and Society* connects the core themes of environmental studies to the urgent issues and debates of the twenty-first century. In an era marked by climate change, rapid urbanization, and resource scarcity, environmental studies has emerged as a crucial arena of study. Assembling canonical and contemporary texts, this volume presents a systematic survey of concepts and issues central to the environment in society, such as social mobilization on behalf of environmental objectives, the relationships between human population, economic growth, and stresses on the planet's natural resources, debates about the relative effects of collective and individual action, and unequal distribution of the social costs of environmental degradation. Organized around key themes, with each section featuring questions for debate and suggestions for further reading, the book introduces students to the history of environmental studies and demonstrates how the field's interdisciplinary approach uniquely engages the essential issues of the present.

### **Synergy**

Peter Cornish, Gillian Berry, 2025-05-19. *Synergy: The Healing Energy Guiding Stepped Care 2.0* is a hybrid text that explores the theory and practice of synergy as it relates to the Stepped Care 2.0/SC2.0 model for mental health care. Building on the previous volumes in this series, *Stepped Care 2.0: A Paradigm Shift in Mental Health Care* and *Stepped Care 2.0: The Power of Conundrums*, this third book consists of a series of essays on synergy, the philosophical idea undergirding SC2.0. Drawing on a wide range of tools from the social sciences and humanities,

these essays build an argument for why a holistic and restorative approach to mental health care should incorporate synergistic perspectives and practices arising from global traditions of Indigenous psychology By blending theory storytelling and academic analysis this book provides an answer to the questions raised in the previous volumes Using what the editors identify as the Strands of Synergy it also offers guidance for practitioners seeking to incorporate synergy into their own practice both in the context of the SC2 0 model and in the clinical world more generally

**The Embarrassment of Being Human** Benjamin Boysen, 2024-12-24 With the message that everything in a sense is alive thus allowing us to join forces with new politico ethical communities stretching across human and nonhuman realms the new materialisms have captivated the minds of many academics artists and intellectuals by stressing that it is time to return to a premodern mindset and discard modernity and its concepts of secularization autonomy and finitude The Embarrassment of Being Human not only demonstrates how these magical materialisms are beset by grave theoretical and practical inconsistencies and self contradictions It also demonstrates how their demand for humans to step down and allow for an emancipation of things qualifies the new materialisms as a metaphysics of neoliberalism that reproduces and fortifies the self contradictions rampant in the current neoliberal hegemony While helping us to gain a comprehensive understanding of the tenets of the eerie ills of our epoch the critique of the new materialisms can furthermore inspire us to appreciate how the exact inversion of the new materialist complex amounts to a revitalization of the modern project A revitalization that is critical to think our epoch differently

**The Justification of War and International Order** Lothar Brock, Hendrik Simon, 2021 In the past few decades the understanding of the relationship between nations has undergone a radical transformation The role of the traditional nation state is diminishing along with many of the traditional vocabularies which were once used to describe what has been called ever since Jeremy Bentham coined the phrase in 1780 international law The older boundaries between states are growing ever more fluid new conceptions and new languages have emerged which are slowly coming to replace the image of a world of sovereign independent nation states which has dominated the study of international relations since the early nineteenth century This redefinition of the international arena demands a new understanding of classical and contemporary questions in international and legal theory It is the editors conviction that the best way to achieve this is by bridging the traditional divide between international legal theory intellectual history and legal and political history The aim of the series therefore is to provide a forum for historical studies from classical antiquity to the twenty first century that are theoretically informed and for philosophical work that is historically conscious in the hope that a new vision of the rapidly evolving international world its past and its possible future may emerge Book jacket
