New Frontiers in Forensic Linguistics Monwabisi Ralarala, Russell Kaschula, Georgina Heydon, 2019-06-25 The field of forensic linguistics is a niche area that has not enjoyed much participation from the African continent The theme of language and the law in this book is one that straddles two important aspects of the legal history of South Africa in particular and how it has impacted on the country's legal and education systems The declaration by the United Nations of 2019 as The International Year of Indigenous Languages is opportune not only for the launch of this book but for what its research content tells us of the strides taken in ensuring access to justice for all citizens of the world in a language they understand The contributions by authors in this book tell the story of many African citizens and those hailing from beyond our borders who straddle the challenges of linguistic and legal pluralism in courtrooms across their respective countries It is our hope that the contributions made in this book will assist in ensuring human rights become a reality for global citizens where indigenous voices have not been heard and that these citizens will be free to give their testimonies in a language of their choice and that they may be heard and understood

Shaw,2008-03-01 This volume connects career making to the general social context in which it takes place careermaking individuals to the large institutional establishment in which they operate and specifically career academicians to the overall knowledge enterprise

from which they draw their intellectual inspiration on which they build their career achievements and to which they contribute their personal talents The main purpose is to explore what academic institutions the knowledge enterprise and the society as a whole can and ought to do to enhance productivity facilitate performance and improve experience of individual academicians in their career making endeavor Although various innovative ideas are presented to improve normal procedures or standard processes throughout academia answers to this focal question often lie in different levels of organizational units involved in academic operation That is what should a department do for its faculty a college for its departments a university for its colleges an association for its member organizations or a government for its academic institutions in the best interest of the latter Similarly although reformative measures are proposed to the attention of established entities or institutionalized systems change within the existing situation or practice to a large degree depends upon how people in various social roles relate to each other in attitude as well as in behavior when they perform their specific job In other words what should a professor do for graduate students a senior scholar for junior colleagues a chair for faculty members a dean for chairs a university chancellor for deans an editor for authors or an association president for the general membership from the due perspective of the latter The logic or legitimacy of examining this focal question and its organizational unit and social role is clear a shining academician owes much to the support of his or her assistants students and followers a rising university builds on the productivity of its individual divisions and a thriving knowledge enterprise depends upon the success of individual career making scholars Beyond its own functionality and success by division of labor the higher level or the larger system has an inescapable responsibility to ensure that individual players or components therein grow develop and perform to the best of their potential In content this volume consists of sixteen chapters Chapter 1 identifies main pathways and stages in academic careers Chapters 2 5 focuses on the career process exploring major requirements that an academician has to work on and fulfill in his or her career making endeavor These requirements include educational preparation job search institutional placement and professional networking Chapters 6 15 centers on the career structure examining essential elements that a scholar has to build and maintain in his or her career identity These elements range from the academic degree position publication teaching presentation service grants awards and membership in academic associations to tenure The last chapter capitalizes on the curriculum vitae as a miniature of the academic personality that a career professional must present to the community of scholarship
