**Tobacco and Health** K. Slama,2012-12-06 Over 1 100 delegates

from a hundred countries attended the 9th World Conference on Tobacco and Health. After five days of debate, several important resolutions were adopted unanimously and will be landmarks in the fight against tobacco. This great success is due to three facts which emerged from the discussions:

1. It appears clearly now that the risks associated with tobacco are much greater than previously assumed. Out of two regular smokers, one will die from a tobacco-related disease.
2. Reducing tobacco consumption can be achieved, but the data collected in several countries show that it requires a global strategy. This strategy was much debated during the conference.

The resolutions adopted emphasize the agreement of the delegates on the main points: Action to fight the growing epidemic of tobacco attributable disease and death involves convincing the general public, the medical community, and decision makers of the need to act for tobacco control. The most efficient tools for helping individuals never to start or successfully to stop using tobacco should be developed. Effective tobacco control endeavors are required to counteract the actions of the powerful and influential tobacco manufacturers. With the help and under the aegis of WHO, DICC, IUATLD, ISFC, IOCD, and IUHPE, an international alliance for health and against tobacco should unite all those who are engaged in this fight.

**Cement-based Composites: Materials, Mechanical Properties and Performance** A.M. Brandt, 2003-09-02. This book considers the properties and behaviour of cement based materials from the point of view of composite science and technology. Emphasis is put on non conventional reinforcement and design.

Communication, Meaning and Misconceptions Karol Janicki, 2024-06-21. This book covers several related topics anchored in the idea of how meaning is created. The central focus in the book is, however, on how language awareness may help us communicate smoothly and solve social problems. The book takes up language misconceptions and their social significance and promotes the view that regarding meaning and language in general as open and flexible rather than closed and rigid may lead to critical thinking, innovation, and creativity. The book covers topics such as words and things, words and emotions, fake news, and hate speech, and it has been written in the form of short informal dialogues to engage readers and make linguistic concepts accessible.
