## States of Matter

**Matter** is anything that takes up space. All matter is made up of tiny particles. Most matter is one of three forms, called **states of matter**. The three main states of matter are **gas**, **liquid**, and **solid**. Their particles act in different ways. Water can help you understand the states of matter because it comes in all three states. It changes state when heated or cooled.

### Gas

The particles in gases are spread far apart. They move around a lot.

Gases change shape and spread out to fill all the space in a container.

Particles

Form of Water

water vapor

### Liquid

The particles in liquids are closer together. They still move around a bit and slide against each other.

Liquids change shape to fill the same amount of space in any container.

liquid water

### Solid

The particles in solids are packed tightly together. They barely move at all.

Solids do not change shape.
