Teachers of grades K-12 will find short probes with grade-band specifics that provide easy-to-follow suggestions for addressing students' ideas by promoting learning through conceptual change instruction. Volume 4 adds to the probes in physical life and Earth and space science with a new category called unifying principles. Also covered is a discussion on balancing formative assessment with summative assessment. Research in Education, 1974

Researching Practitioner Inquiry as Professional Development Rose M. Pringle, 2020-12-14 This book presents the authentic voices of science teachers engaged in practitioner inquiry as one component of a comprehensive professional development program. Practitioner inquiry as a genre of educational research allows teachers to intentionally study their practices, thus generating practical solutions to problems in their teaching and students' learning. The teachers' voices allowed us to enter their science classrooms to observe their posture and practices as reflective practitioners. They encountered issues such as culturally responsive teaching and low literacy proficiency and metacognitive skills among their struggling science learners. Their firsthand accounts provide new insights about practitioner inquiry as a tool to support teachers' continuous learning regardless of the disciplinary content areas. The book therefore provides a blueprint that can inform inservice teacher educators and support school and district administrators as they seek to nurture teachers' professional growth.

Brain Framing Dr. Linda Karges-Bone, 2011-09-01 *Brain Framing* is a book of ideas for thinking about thinking in the classroom. Ideas to help us frame the brains of students in ways that are productive, powerful, and personal. This book will help teachers to engage brains in three fresh ways: framing student learning into more personalized experiences that utilize new research on the brain, the body, and the spirit; creating brain-friendly classroom environments that link sensory and cognitive experiences in ways that reduce stress for both the teacher and the student; and organizing content into meaningful chunks and layers that fit into the unique frames of students' brains. Filled with a variety of new teaching strategies, curriculum-enhancing ideas, lesson planning samples, and reproducible templates based on current scientific research, *Brain Framing* is the perfect resource for any teacher who wants to begin planning with the brain in mind.

Preparing Informal Science Educators Patricia G. Patrick, 2017-01-16 This book provides a diverse look at various aspects of preparing informal science educators. Much has been published about the importance of preparing formal classroom educators, but little has been written about the importance, need, and best practices for training professionals who teach in aquariums, camps, parks, museums, etc. The reader will find that, as a collective, the chapters of the book are well related and paint a clear picture that there are varying ways to approach informal educator preparation, but all are important. The volume is divided into five topics: Defining Informal Science Education, Professional Development, Designing Programs,

Zone of Reflexivity The Space Between Formal and Informal Educators and Public Communication The authors have written chapters for practitioners researchers and those who are interested in assessment and evaluation formal and informal educator preparation gender equity place based education professional development program design reflective practice and science communication Readers will draw meaning and usefulness from the array of professional perspectives and be stimulated to begin a quest to scaffold programs and professional development around the frameworks described in this book
