

Using R2D2 to Answer Short Response Questions

The Warmup

10 minutes

Say

Today, I'd like to show you a tool to maximize the points you receive for a short response question. First, let me share with you how short answers are generally scored.

3 points	You'll get 3 points if you make proper inferences from the text and then back up your inferences with details from the reading passage. Making inferences means using what you've read to come to a conclusion. You also need to write in complete sentences.
1 point	You'll get 1 point if you just repeat or restate the text without making proper inferences from what you've read. You do not do as good a job pulling details from the text, and you don't write in complete sentences.
0 points	You'll get 0 points if you have no response or a response that doesn't address the question at all.

Ask

So when you respond to a short answer question, how many points should you be aiming for?

Say

We want to score 3 points. The good news is that I know the "secret formula" that will have you score 3 points on every short answer question you tackle.

Ask

Would you like me to let you in on this secret?

How many of you have heard of R2D2 from the Star Wars films?

Say

R2D2 was a droid who was very useful in rescuing his masters and friends from peril. He was always able to provide a solution. We're going to use R2D2 to help us do the same thing.
