## 5 Centimeters Per Second:

*5 Centimeters per Second: one more side* Makoto Shinkai, 2019-02-26 A contemporary classic 5 Centimeters per Second won animator Makoto Shinkai international renown as a rare talent Indeed he just might be one of the most powerful bards of romantic longing and thwarted love working today in any medium This official novelization narrates from the other side for instance from the point of view of the girl rather than the boy in the legendary first segment Cherry Blossoms to tell a story that is both deeply engaging for first timers and astonishingly fresh for fans of the film The author of fantasy novels based on the Shining videogame series Arata Kanoh is best known for his imaginative prose adaptations of the masterpieces of Japan s hottest animator Most recently his take on Your Name was the 1 Kindle bestseller at Amazon Japan [Forcing Long Surface Waves Through Two-port Basins](#) D. McGhee, Jr., 2019-10-15 An analysis of patterns of convergent evolution on Earth that suggests where we might look for similar convergent forms on other planets Why does a sea lily look like a palm tree And why is a sea lily called a lily when it is a marine animal and not a plant Many marine animals bear a noticeable similarity in form to land dwelling plants And yet these marine animal forms evolved in the oceans first land plants independently and convergently evolved similar forms much later in geologic time In this book George McGhee analyzes patterns of convergent evolution on Earth and argues that these patterns offer lessons for the search for life elsewhere in the universe Our Earth is a water world 71 percent of the earth s surface is covered by water The fossil record shows that multicellular life on dry land is a new phenomenon for the vast majority of the earth s history 3 500 million years of its 4 560 million years of existence complex life existed only in the oceans Explaining that convergent biological evolution occurs because of limited evolutionary pathways McGhee examines examples of convergent evolution in forms of feeding immobility and mobility defense and organ systems McGhee suggests that the patterns of convergent evolution that we see in our own water world indicate the potential for similar convergent forms in other water worlds We should search for extraterrestrial
