Lemaster,Dietland Müller-Schwarze,2006-11-09 The editors and contributors to this volume should be justifiably proud of their participation in the tenth triennial meeting of the Chemical Signals in Vertebrates International Symposium This meeting was held 27 years after the initial gathering of participants in Saratoga Springs New York from June 6 to 9 1976 Subsequent meetings have been held every three years in Syracuse New York Sarasota Florida Laramie Wyoming Oxford

England Philadelphia Pennsylvania Tübingen Germany Ithaca New York and Krakow Poland This tenth anniversary symposium was held from July 29 through August 1 in Corvallis Oregon and was hosted by the Zoology Department and Biology Programs of Oregon State University This book also represents the tenth in a series of books on chemical communication chemical ecology olfactory and vomeronasal research in vertebrate species The species covered in the chapters herein range from fish to mammals including humans By taxonomic breakdown the mammals are the most represented in number of species and chapter contributions However the hosts of the meeting endeavored to have some representative contributions covering all of the major vertebrate taxa As in past years the meeting was well represented with just over 100 participants from 13 different nations Plenary talks focused on some of the non mammalian groups that have tended to be less represented in these symposia Thus we had a very nice overview of comparisons and contrasts of invertebrate chemical communication to vertebrate systems

**First International Symposium On Current Issues of Drug Abuse Testing** Jordi Segura, Rafael de la Torre, 1991-10-29 This book elaborates on the topics covered by top experts in the field of drug testing at an international symposium held in March 1990 The book is an excellent reference for all professionals involved in the set up performance and interpretation of results for drug testing programs using biological fluids especially urine U S and European perspectives are presented in relation to workplace testing Organizational aspects for reliability of drug testing include topics ranging from sample collection chain of custody and laboratory strategies to legal and regulatory aspects Critical reviews of analytical methodology involve descriptions and critical issues for the major presumptive and confirmatory techniques including immunological and gas chromatographic mass spectrometric methodologies The book's interpretation of results takes into account the metabolic pharmacokinetic pharmacodynamic and clinical aspects The final chapters of the book include topics addressing aspects for potential international harmonization
