5e Lesson Plan For Earths Rotation:

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Educating English Learners Joyce W. Nutta, Carine Strebler, Kouider Mokhtari, Florin M. Mihai, Edwidge Crevecoeur Bryant, 2020-07-29 In *Educating English Learners*, Joyce W. Nutta and her colleagues offer practical tools for helping schools and teachers successfully integrate English learners into mainstream classrooms. Drawing on the One Plus model presented in their award-winning book *Preparing Every Teacher to Reach English Learners*, the authors now turn their attention to the needs of K-12 teachers who typically have two or three English learners in their classrooms. English learners are not a homogenous group and the challenges they face vary tremendously. Nutta and her colleagues present protocols and case studies to help pre-service and in-service teachers understand the needs of English learners in their classrooms and differentiate instruction and assessment accordingly. Woven throughout the book are the stories of Gero, Edith, Tasir, and Edgar, four case study students of different ages, backgrounds, and levels of English proficiency. The authors show how the protocols they provide can be applied to adapt sample lessons for students like these across a range of grade levels, subject areas, and pedagogical approaches. Finally, the authors show how the system can be applied school-wide for a collaborative approach to meeting English learners' needs.
