

Chemistry of Life Biology MCAS Review Preview

The way I used these MCAS Review Worksheets as class is as follows. Starting about six weeks before the Biology MCAS I would have "MCAS Review Fridays". I divided the class into teams. I put a set of tables at the front of the classroom, with paper and pencils set out. Each student would take a turn coming up to the table. I would check the questions on the screen. We would go over the questions. I would explain how the state asked the questions, and what the students should look for. The students would write down the correct answer. If they got it right for many would get a point. The team with the most points at the end of class would get some type of prize. I found that conducting the review in this manner made each student participate. That also gave me a fun way to review the concepts that the students would be tested on.

These reviews were extremely beneficial to my students. My student's pass rate exceeded that of students from other teachers at the school I worked at.

A teacher displayed some nutrition data labels for students to examine. Portions of the labels from two different foods are shown below.

Food 1

| Nutrition Facts | |
|-------------------------------|--|
| Serving Size 10 g | |
| Amount per Serving | |
| Total Fat 10 g | |
| Cholesterol 50 g | |
| Total Carbohydrate 1 g | |
| Protein 5 g | |

Food 2

| Nutrition Facts | |
|-------------------------------|--|
| Serving Size 10 g | |
| Amount per Serving | |
| Total Fat 5 g | |
| Cholesterol 5 g | |
| Total Carbohydrate 5 g | |
| Protein 5 g | |

- Identify the primary type of molecule found in Food 1 and describe the molecular structure of this type of molecule.
- Identify the primary type of molecule found in Food 2 and describe the molecular structure of this type of molecule.
- The teacher told the students that one of the foods is a type of fruit and the other is a type of meat. Identify which food is the fruit and which is the meat. Give evidence to support your answer.

The following student response is provided for

The student wrote the answers above. The student was asked to identify the primary type of molecule found in each food. The student identified protein as the primary molecule found in both foods. The student also identified protein as the primary molecule found in both foods. The student also identified protein as the primary molecule found in both foods.

The student also wrote the following statements. The student wrote the following statements. The student wrote the following statements. The student wrote the following statements.

- The primary molecule found in Food 1 is protein.
- The primary molecule found in Food 2 is protein.
- The primary molecule found in Food 1 is protein.
- The primary molecule found in Food 2 is protein.
