

Understandings, Applications and Skills (This is what you maybe assessed on)**Significant ideas**

- Biodiversity can be identified in a variety of forms, including species diversity, habitat diversity and genetic diversity.
- The ability to both understand and quantify biodiversity is important to conservation efforts

Big Questions:

- How are issues addressed in this topic of relevance to sustainability or sustainable development
- In what ways might the solutions explored in this topic alter our predictions for the state of human societies and the biosphere some decades from now?
- Unsustainable development can lead to species extinction. Given the five mass extinctions of the past, is this something that the human race should be concerned about?
- What effects could species extinctions have on human societies in years to come?

	Statement	Guidance
3.1.U1	Biodiversity is a broad concept encompassing the total diversity of living systems, which includes the diversity of species, habitat diversity and genetic diversity.	
3.1.U2	Species diversity in communities is a product of two variables: the number of species (richness) and their relative proportions (evenness)	Species diversity within a community is a component of the broader description of the biodiversity of an entire ecosystem
3.1.U3	Communities can be described and compared through the use of diversity indices. When comparing communities that are similar, low diversity could be indicative of pollution, eutrophication or recent colonization of a site. The number of species present in an area is often indicative of general patterns of biodiversity	
3.1.U4	Habitat diversity refers to the range of different habitats in an ecosystem or biome.	
3.1.U5	Genetic diversity refers to the range of genetic material present in a population of a species.	
3.1.U6	Quantification of biodiversity is important to conservation efforts so that areas of high biodiversity may be identified, explored, and appropriate conservation put in place where possible.	
3.1.U7	The ability to assess changes to biodiversity in a given community over time is important in assessing the impact of human activity in the community	
3.1.A1	Distinguish between biodiversity, diversity of species, habitat diversity and genetic diversity.	
3.1.A2	Comment on the relative values of biodiversity data.	Interpreting diversity is complex; low diversity can be present in natural; ancient and unpolluted sites.
3.1.A3	Discuss the usefulness of providing numerical values of species diversity to understanding the nature of biological
