

# Call FOR APPLICATIONS August 2025 Intake

## Undergraduate Programmes 2025/26 Academic Year

The University is calling all eligible critical thinkers, problem solvers and STEM-focused candidates to **APPLY** and explore the world of Science, Engineering and Technology.

### SCHOOL OF EARTH SCIENCES & ENGINEERING

- BEng Chemical Engineering
- BEng Civil & Environmental Engineering
- BEng Geological Engineering
- BEng Materials & Metallurgical Engineering
- BEng Mining Engineering
- BSc Earth & Environmental Sciences
- BSc Environmental Science
- BSc Geology

### SCHOOL OF LIFE SCIENCES

- BSc Biological Sciences & Biotechnology

### SCHOOL OF PURE & APPLIED SCIENCES

- BSc Computer Science & Software Engineering
- BSc Forensic Sciences
- BSc Information Systems & Data Management
- BSc Physics
- BSc Pure & Applied Chemistry
- BSc Pure & Applied Mathematics
- BSc Statistics

### Application Procedure

- Ensure that you have internet connection and a valid email account to use as your username. If you do not have an existing email account, please create one.
- Follow the link below to complete an online application <https://custom.biust.ac.bw/OnlineApplication>
- Attach valid and certified supporting documents such as your Omang/passport, Statement of results and or transcripts/certificates.
- A non-refundable application Fee of P200.00(locals/SADC) and P400 for international applicants.

**Closing Date: 30<sup>th</sup> April 2025**

### SCHOOL OF ELECTRICAL & MECHANICAL ENGINEERING

- BEng Computer & Telecommunications Engineering
- BEng Electrical & Electronics Engineering
- BEng Industrial & Manufacturing Engineering
- BEng Mechanical & Energy Engineering
- BEng Mechatronics & Industrial Instrumentation Engineering

### Entry Requirements:

- A minimum of 38 points from six (6) subjects which must include Mathematics, two Sciences or Science Double Award, English and any other 2 best subjects.
- A minimum of 20 points from a combination of Mathematics and any two Pure Science subjects or Science Double award.
- A-level holders with a minimum of 3 credits in Mathematics and 2 Science subjects
- BSc General year 1 holders or equivalent, with a CGPA of 3.6 or more at any recognised University will be considered for direct entry into second year.
- Diploma holders with a CGPA of 3.6 or more will also be considered for direct entry into the second year of study, based on the relevance of their prior programmes of study to their programmes of interest.

## **Biust Postgraduate Courses:**

**Botswana**, 2001      *Wireless Communication Networks and Internet of Things* Adamu Murtala Zungeru, S Subashini, P Vetrivelan, 2018-05-09 This book is a collection of papers from international experts presented at International Conference on NextGen Electronic Technologies ICNETS2 2016 ICNETS2 encompassed six symposia covering all aspects of electronics and communications domains including relevant nano micro materials and devices Presenting recent research on wireless communication networks and Internet of Things the book will prove useful to researchers professionals and students working in the core areas of electronics and their applications especially in signal processing embedded systems and networking

*Higher Education Financing in East and Southern Africa* Pundy Pillay, 2010 This nine country study of higher education financing in Africa includes three East African states Kenya Tanzania and Uganda five countries in southern Africa Botswana Lesotho Mozambique Namibia and South Africa and an Indian Ocean island state Mauritius Higher Education Financing in East and Southern Africa explores trends in financing policies paying particular attention to the nature and extent of public sector funding of higher education the growth of private financing including both household financing and the growth of private higher education institutions and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints This unique collection of African country case studies draws attention to the remaining challenges around the financing of higher education in Africa but also identifies good practices lessons and common themes      **Globalization, Mass Education and Technical and Vocational Education and Training** Miriam

Preckler Galguera, 2018-06-05 This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training TVET systems in the Southern African Community Region SADC focusing particularly on Botswana and Namibia Designed around UNESCO s Better Education for Africa s Rise BEAR project the study is an excellent example of applied policy research Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices Ministries of Education and of Labor employers and employees education and training institutions international partners and more Both qualitative and quantitative evidence are used to provide a comparative overview and the author also reveals the current state of data on skills Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO s programs have had at a national level prior to this study Were the newly implemented educational policies successful or not If the public policies failed why was that These chapters shed light on such questions and how UNESCO s contribution influenced the national development processes in the context of globalization processes and trends of global mass education The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work      *Injection Molding Process Modelling* Tien-Chien Jen, Edwell Tafara Mharakurwa, Steven Otieno Otieno, Fredrick Madaraka Mwema, Job Maveke

Wambua,2024-09-11 Injection Molding Process Modelling presents the application of CAE statistics and AI in defect identification control and optimization of injection molding process for quality production It showcases CAE in determining the optimal placement of injection points designing cooling channels and ensuring that the mold will produce parts with the desired specifications The book illustrates the capability of the CAE tools to simulate molten plastic flow within a mold during the injection molding process Explaining how the use of CAE statistical tools and AI enhances efficiency accuracy and collaboration the book explores the contributions to injection molding in product design and visualization prototyping and testing mold design and analysis and simulation It emphasizes the integration of statistical tools for optimized efficiency and waste reduction including statistical process control SPC Design of Experiments DOE Regression Analysis Capability Indices Interaction effects and many more The book also illustrates the predictive modelling of typical injection molded product defects using intelligent algorithms The book will interest industry professionals and engineers working in manufacturing production automation and quality control

**Advancements in Artificial Intelligence, Blockchain Technology, and IoT in Higher Education** Subhendu Kumar Pani,Kamalakanta Muduli,Sujoy Kumar Jana,Srikanth Bathula,Golam Sarwar Khan,2023-06-23 With a need to find alternatives to the traditional face to face teaching and learning during the pandemic this topical volume discusses the best use of technologies in higher education addressing the growing role of AI in the digital transformation of higher education systems With chapters from eminent professors researchers and others involved in higher education from a selection of different countries the volume looks at blockchain and IoT technologies to create smart universities now and for the future

**Data-Driven Optimization of Manufacturing Processes** Kalita, Kanak,Ghadai, Ranjan Kumar,Gao, Xiao-Zhi,2020-12-25 All machining process are dependent on a number of inherent process parameters It is of the utmost importance to find suitable combinations to all the process parameters so that the desired output response is optimized While doing so may be nearly impossible or too expensive by carrying out experiments at all possible combinations it may be done quickly and efficiently by using computational intelligence techniques Due to the versatile nature of computational intelligence techniques they can be used at different phases of the machining process design and optimization process While powerful machine learning methods like gene expression programming GEP artificial neural network ANN support vector regression SVM and more can be used at an early phase of the design and optimization process to act as predictive models for the actual experiments other metaheuristics based methods like cuckoo search ant colony optimization particle swarm optimization and others can be used to optimize these predictive models to find the optimal process parameter combination These machining and optimization processes are the future of manufacturing Data Driven Optimization of Manufacturing Processes contains the latest research on the application of state of the art computational intelligence techniques from both predictive modeling and optimization viewpoint in both soft computing approaches and machining processes The chapters provide solutions applicable to machining or manufacturing process problems and for

optimizing the problems involved in other areas of mechanical civil and electrical engineering making it a valuable reference tool This book is addressed to engineers scientists practitioners stakeholders researchers academicians and students interested in the potential of recently developed powerful computational intelligence techniques towards improving the performance of machining processes

**Critical Developments and Applications of Swarm Intelligence** Shi,

Yuhui,2018-02-28 Artificial intelligence is a constantly advancing field that requires models in order to accurately create functional systems The use of natural acumen to create artificial intelligence creates a field of research in which the natural and the artificial meet in a new and innovative way Critical Developments and Applications of Swarm Intelligence is a critical academic publication that examines developing research technologies and function regarding natural and artificial acumen specifically in regards to self organized systems Featuring coverage on a broad range of topics such as evolutionary algorithms optimization techniques and computational comparison this book is geared toward academicians students researchers and engineers seeking relevant and current research on the progressive research based on the implementation of swarm intelligence in self organized systems

**Design, Development, and Optimization of Bio-Mechatronic Engineering Products** Kumar, Kaushik,Davim, J. Paulo,2019-03-15 Biomechanical engineering is involved with creating and producing a variety of products in everyday use from environmentally safe plastics to various foods fabrics and medicines A combination of engineering and biology it is a fast growing field with many new and exciting opportunities in genetic engineering and biotechnology However research surrounding biomechanical applications is scattered and often restricted leading to the need for a comprehensive publication of the recent advances and developments in this emerging field Design Development and Optimization of Bio Mechatronic Engineering Products provides pivotal research on the application of combining mechanical engineering with human biological systems in order to develop bio mechatronic products like pacemakers artificial kidney replacements artificial hearts and new joints or limbs to better and more accurately monitor and advance human health While highlighting topics such as orthotic devices inter electrode gap and biomaterial applications this publication explores producing artificial material to work in sync with the human body This book is ideally designed for engineers health professionals technology developers researchers academicians and students

**Emerging Technologies in Agriculture, Livestock, and Climate** Abid Yahya,2019-12-26 This book provides applications of wireless sensor networks WSN in environmental monitoring with an emphasis on livestock disease detection and agricultural management in Africa to aid farmers This proposed system entails current and innovative monitoring technologies intended to improve agricultural conditions in Africa with a focus on Botswana and addresses the Internet of Things IoT as a set of remote monitoring protocols using WSNs to improve and ensure proper environmental maintenance In this book the author introduces WSNs and how the IoT can be applied to develop a system of smart agriculture in Africa taking into account livestock health climate change impacts on crops and wildlife and technological innovations in response to climate change

such as windmills and solar panels The book will be interesting to students and researchers in engineering and life sciences as well as practitioners working with sensing technologies for agricultural monitoring and improvement
