*Building and Civil Technology* Chris De Jager,1999      *Essentials of Smart Building Technology* Onyema Daniel Udeze,2019-04-08

The term Smart Home generates a lot of buzz in recent times Most of the times the idea resonates around ad hoc solutions that convert your home into a digital gadget Google Apple Amazon etc has lots of solutions that make homes more fun and entertaining in recent times However just a few people have given Home Technology a very holistic thought An iPhone is a unified product marrying hardware and software same as recent automobiles But when it comes to homes there is a party that is just concerned with the Building Structure Delivery and yet another party concerned with Building Technology This brings about a divide and ends up keeping homes from being unified solutions that they should be This book challenges that status quo It began by exploring the concepts of Smart Homes The Fundamentals the Technology Foundations the Structural Components the Technological Components The first part ended by offering some very Unique Innovations that are only possible with the Technology Foundations of Smart Building Technology Such innovations as the use of Direct Electricity Solar Operating Systems Unified Cabling etc The second part of the book tells a holistic story of the Smart Home Delivery Company Imagine Apple for Smartphones or Mercedes for Automobiles This started with the Planning Process then to the Design Coordination and then to the wider Value Chain to the Prefabrication Process It ended with the Management of the Smart Home Facility The role of such transformational processes as Building Information Modeling BIM is a central theme of the second part of this book The last part proffers solutions that are possible with Smart Building Technology Again this is from a very holistic viewpoint It summarizes the book in a very interactive way taking the reader through the journey of purchasing a Unified Smart Home in a similar way you purchase an iPhone A very important takeaway from this book is that Smart Homes should holistically merge a Building Structure with the Building Technology right from the design stage of the home This concept can easily be extended to other types of buildings Commercial Entertainment etc We believe that by reading this book you will gain a renewed sense of refreshment about the future of the Architecture Engineering and Construction AEC sector

**Construction Technology and Management** Rajesh Kumar R,2022-08-21 Construction technology focuses on principles use of standards and the steps involved in the design and construction of buildings and structures We have included numerous neatly drawn figures for the better understanding of the subject

**Modern Construction** Lincoln H. Forbes,Syed M. Ahmed,2010-10-13 During the past several decades the manufacturing and service industries significantly increased their levels of productivity quality and profitability through the application of process

improvement techniques and information technology Unfortunately the construction industry lags far behind in the application of performance improvement and optimization techniques as well as its overall competitiveness Written by Lincoln H Forbes and Syed M Ahmed both highly regarded for leadership and innovation Modern Construction Lean Project Delivery and Integrated Practices offers cutting edge lean tools and other productive strategies for the management of people and processes in the construction industry Drs Forbes and Ahmed focus mainly on lean construction methodologies such as The Last Planner R System The Lean Project Delivery System TM and Integrated Project Delivery TM The tools and strategies offered draw on the success of the world renowned Toyota Production System TPS adapted to the construction environment by construction professionals and researchers involved in developing and advocating lean construction methods The book also discusses why true lean construction can best occur when all the construction stakeholders owners designers constructors and material suppliers are committed to the concept of optimizing the flow of activities holistically while de-emphasizing their self interest The authors also reintroduce process improvement approaches such as TQM and Six Sigma as a foundation for the adoption of lean methodologies and demonstrate how these methods can improve projects in a so called traditional environment The book integrates these methods with emerging interest in green construction and the use of information technology and Building Information Modeling BIM while recognizing the human element in relation to motivation safety and environmental stresses Written specifically for professionals in an industry that desperately needs to play catch up the book delineates cutting edge approaches with the benefit of successful cases and explains how their deployment can improve construction performance and competitiveness
