Parliament, 1879 *Precision in Architecture* Mhairi McVicar, 2019-05-13 This book offers a detailed insight into the desire for and consequences of precise communications in the daily life of contemporary architectural practice through close readings of constructed architectural details by Sigurd Lewerentz Caruso St John Architects Mies van der Rohe and OMA In the professionalised context of the contemporary architectural profession precise communications drawings specifications letters faxes and emails are charged with the complex task of translating architectural intent into a neutral and quantifiable language which is expected to guarantee an exact match between the architects intentions and the constructed result Yet as any architectural practitioner will know it is doubtful whether the construction of any architectural project may ever exactly match all written and drawn predictions This book challenges claims to certainty which have been attributed to such communications from the mid nineteenth century onwards and critiques ongoing expectations of certainty in contemporary architectural production Architecture in Dialogue with an Activated Ground Urs Bette, 2020-03-30 *Architecture in Dialogue with an Activated Ground* sets out to validate the role of the unreasonable in the design process Using case study projects architect Urs Bette gives an insight into the epistemological processes of his creative practice and unveils the strategies he deploys in order to facilitate the poetic aspects of architecture within a discourse whose evaluation parameters predominantly involve reason Themes discussed include the emergence of space from the staged opposition

between the architectural object and the site and the relationship between emotive cognition and analytic synthesis in the design act In both cases there is a necessary engagement with forms of unreasonable thought action or behaviours By arguing for the usefulness and validity of the unreasonable in architecture and by investigating the performative relationship between object and ground Bette contributes to the discourse on extensions growth and urban densification that tap into local histories and voices including those of the seemingly inanimate the architecture itself and the ground it sits upon to inform the site related production of architectural character and space In doing so he raises debates about the values pursued in design approval processes and the ways in which site relatedness is both produced and judged
