Constructing the Adolescent Reader in Contemporary Young Adult Fiction Elisabeth Rose Gruner,2019-05-17 This book examines the way young adult readers are constructed in a variety of contemporary young adult fictions arguing that contemporary young adult novels depict readers as agents Reading these novels suggest is neither an unalloyed good nor a dangerous ploy but rather an essential occasionally fraught by turns escapist and instrumental deeply pleasurable and highly contentious activity that has value far beyond the classroom skills or the specific content it conveys After an introductory chapter that examines the state of reading and young adult fiction today the book examines novels that depict reading in school gendered and racialized reading reading magical and religious books and reading as a means to developing civic agency These examinations reveal that books for teens depict teen readers as doers and suggest that their ability to read deeply critically and communally is crucial to the development of adolescent agency Alternating Narratives in Fiction for

Young Readers Perry Nodelman,2017-04-17 This book is about the implications of novels for young readers that tell their stories by alternating between different narrative lines focused on different characters It asks if you make sense of fiction by identifying with one main character how do you handle two or more of them Do novels with alternating narratives diverge from longstanding conventions and represent a significant change in literature for young readers If not how do these novels manage to operate within the parameters of those conventions This book considers answers to these questions by means of a series of close readings that explore the structural educational and ideological implications of a variety of American British Canadian and Australian novels for children and for young adults Literature for Young Adults Joan L.

will help readers teach young adults the language they need to articulate their responses to the books they are reading
