**Sulfur-Centered Reactive Intermediates in Chemistry and Biology** C. Chatgililoglu,Klaus-Dieter

Asmus,2013-03-08 A wonderfully successful NATO Advanced Study Institute on Sulfur Centered Reactive Intermediates in Chemistry and Biology was held 18-30 June 1989 at the Hotel Villa del Mare in Maratea Italy. Despite the beautiful setting with mountains behind us and overlooking the clear blue Mediterranean Sea under a cloudless sky and with a private beach available, the lectures were extremely well attended. While some credit can go to the seriousness of the students, more must go to the calibre of speakers and the high quality of C. Chatgililoglu and Co-Director Professor K. D. Asmus. Their presentations, the Director Dr Asmus, are to be congratulated for putting together such an outstanding scientific program. Dr Chatgililoglu is also to be commended for arranging an equally stimulating social program which included bus and boat trips to many local sites of interest. It was particularly fitting that a meeting on the chemistry and biochemistry of sulfur should be held in Italy, since Italian chemists have made major contributions to our understanding of the organic chemistry of sulfur, including the chemistry of its reactive intermediates. The early Italian interest in sulfur chemistry arose from the fact that Italy, or more specifically Sicily, was a major world producer of sulfur prior to the development and exploitation of the Frasch process in Texas and Louisiana.

Wise,2008-04-15 What accounts for the striking decline in labor force participation at increasingly younger ages? Social Security and Retirement around the World examines one explanation: social security programs actually provide incentives for early retirement. This volume houses a set of remarkable papers that present information on the social security systems and labor force participation patterns in Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Spain, Sweden, the United Kingdom, and the United States.
