Language and the Ineffable Louis S. Berger, 2011-01-20 One's conception of language is central in fields such as linguistics but less obviously so in fields studying matters other than language In *Language and the Ineffable* Louis S. Berger demonstrates the flaws of the received view of language and the difficulties they raise in multiple disciplines This breakthrough study sees past failures as inevitable since reformers retained key detrimental features of the received view Berger undertakes a new reform grounded in an unconventional model of individual human development A central radical and generative feature is the premise that the neonate's world is holistic boundary less unimaginable impossible to describe in other words ineffable completely distinct from what Berger calls adultocentrism The study is a wholly original approach to epistemology separate from the traditional interpretations offered by skepticism idealism and realism The work rejects both the independence of the world and the possibility of true judgment a startling shift in the traditional responses to the standard schema *Language and the Ineffable* evolves a unique conception of language that challenges and unsettles sacrosanct beliefs not only about language but other disciplines as well Berger demonstrates the framework's potential for elucidating a wide range of problems in such diverse fields as philosophy logic psychiatry general experimental psychology psychotherapy and arithmetic The reconceptualization marks a revolutionary turn in language studies that reaches across academic boundaries
