[Handbook of the American Novel of the Twentieth and Twenty-First Centuries](#) Timo Müller,2017-01-11 Increasing specialization within the discipline of English and American Studies has shifted the focus of scholarly discussion toward theoretical reflection and cultural contexts These developments have benefitted the discipline in more ways than one but they have also resulted in a certain neglect of close reading As a result students and researchers interested in such material are forced to turn to scholarship from the 1960s and 1970s much of which relies on dated methodological and ideological presuppositions The handbook aims to fill this gap by providing new readings of texts that figure prominently in the literature classroom and in scholarly debate from James s The Ambassadors to McCarthy s The Road These readings do not revert naively to a time before theory Instead they distil the insights of literary and cultural theory into concise introductions to the historical background the themes the formal strategies and the reception of influential literary texts and they do so in a jargon free language accessible to readers on all levels of qualification

Succeeding Postmodernism Mary K.

Holland,2013-04-25 While critics collect around the question of what comes after postmodernism this book asks something different about recent American fiction what if we are seeing not the end of postmodernism but its belated success

Succeeding Postmodernism examines how novels by DeLillo Wallace Danielewski Foer and others conceptualize threats to individuals and communities posed by a poststructural culture of mediation and simulation and possible ways of resisting the disaffected solipsism bred by that culture Ultimately it finds that twenty first century American fiction sets aside the postmodern problem of how language does or does not mean in order to raise the reassuringly retro question of what it can and does mean it finds that novels today offer language as solution to the problem of language Thus it suggests a new way of reading antihumanist late postmodern fiction and a framework for understanding postmodern and twenty first century fiction as participating in a long and newly enlivened tradition of humanism and realism in literature

9/11: Culture,

Catastrophe and the Critique of Singularity Diana Gonçalves,2016-10-24 Even though much has been said and written about 9 11 the work developed on this subject has mostly explored it as an unparalleled event a turning point in history This book wishes to look instead at how disruptive events promote a network of associations and how people resort to comparison as a means to make sense of the unknown i e to comprehend what seems incomprehensible In order to effectively discuss the complexity of 9 11 this book articulates different fields of knowledge and perspectives such as visual culture media studies performance studies critical theory memory studies and literary studies to shed some light on 9 11 and analyze how the event has impacted on American social and cultural fabric and how the American society has come to terms with such a devastating event A more in depth study of Don DeLillo s Falling Man and Jonathan Safran Foer s Extremely Loud and Incredibly Close draws attention to the cultural construction of catastrophe and the plethora of cultural products 9 11 has inspired It demonstrates how the event has been integrated into American culture and exemplifies what makes up the 9 11 imaginary

Translation and Repetition Ma Carmen África Vidal Claramonte, 2023-07-13

Translation and Repetition: Rewriting Unoriginal Literature offers a new and original perspective in translation studies by considering creative repetition from the perspective of the translator. This is done by analyzing so-called unoriginal literature and thus expanding the definition of translation. In Western thought, repetition has long been regarded as something negative, as a kind of cliché, stereotype or automatism that is the opposite of creation. On the other hand, in the eyes of many contemporary philosophers from Wittgenstein and Derrida to Deleuze and Guattari, repetition is more about difference. It involves rewriting stories initially told in other contexts so that they acquire a different perspective. In this sense, repeating is often a political act. Repetition is a creative impulse for the making of what is new. Repetition as iteration is understood in this book as an action that recognizes the creative and critical potential of copying. The author analyzes how our time understands originality and authorship differently from past eras and how the new philosophical ways of approaching repetition imply a new way of understanding the concept of originality and authorship. Deconstruction of these notions also implies subverting the traditional ways of approaching translation. This is vital reading for all courses on literary translation, comparative literature and literature in translation within translation studies and literature.
