Aspects Of Automatic Text Analysis Aspects Of Automatic Text Analysis:

Aspects of Automatic Text Analysis Alexander Mehler, Reinhard Köhler, 2007-06-24 The significance of natural language texts as the prime information structure for the management and dissemination of knowledge is as the rise of the web shows still increasing Making relevant texts available in different contexts is of primary importance for efficient task completion in academic and industrial settings Meeting this demand requires automatic form and content based processing of texts which enables to reconstruct or even to explore the dynamic relationship of language system text event and context type The rise of new application areas disciplines and methods e g text and web mining testify to the importance of this task Moreover the growing area of new media demands the further development of methods of text analysis with respect to their computational linguistic information theoretical and mathematical underpinning This book contributes to this task It collects contributions of authors from a multidisciplinary area who focus on the topic of automatic text analysis from several i e linguistic mathematical and information theoretical perspectives It describes methodological as well as methodical foundations and collects approaches in the field of text and corpus linguistics In this sense it contributes to the computational linguistic and information theoretical grounding of automatic text analysis *Aspects of Automatic Text Analysis* Alexander

Mehler, Reinhard Köhler, 2007 This book presents recent developments in automatic text analysis Providing an overview of linguistic modeling it collects contributions of authors from a multidisciplinary area that focus on the topic of automatic text analysis from different perspectives It includes chapters on cognitive modeling and visual systems modeling and contributes to the computational linguistic and information theoretical grounding of automatic text analysis **Legal Knowledge**

Representation: Automatic Text Analysis in Public International and European Law Erich Schweighofer, 1999-10-19 This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science A new method of automatic analysis of legal texts is presented in four case studies Law is seen as an information system with legally formalised information processes The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step conceptual indexing and automatic analysis of texts Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems The concept based model for semi automatic analysis of legal texts provides this necessary connection The knowledge base of descriptors context sensitive rules and meta rules formalises properly all important passages in the text corpora for automatic analysis Statistics and self organising maps give assistance in knowledge acquisition The result of the analysis is organised with automatically generated hypertext links Four case studies show the huge potential but also some drawbacks of this approach *Automated Systems in the Aviation and Aerospace Industries* Shmelova, Tetiana, Sikirda, Yuliya, Rizun, Nina, Kucherov, Dmytro, Dergachov, Konstantin, 2019-03-22 Air traffic controllers need advanced information and automated systems to provide a safe environment for everyone traveling by plane One of the primary challenges in developing training

for automated systems is to determine how much a trainee will need to know about the underlying technologies to use automation safely and efficiently To ensure safety and success task analysis techniques should be used as the basis of the design for training in automated systems in the aviation and aerospace industries Automated Systems in the Aviation and Aerospace Industries is a pivotal reference source that provides vital research on the application of underlying technologies used to enforce automation safety and efficiency While highlighting topics such as expert systems text mining and human machine interface this publication explores the concept of constructing navigation algorithms based on the use of video information and the methods of the estimation of the availability and accuracy parameters of satellite navigation This book is ideal for aviation professionals researchers and managers seeking current research on information technology used to reduce the risk involved in aviation
