

Conditional assertion?

- Conditional assertion (Edgington 1995; DeRose and Grandy 1999): a speaker who utters $A \supset B$ asserts B if A is true, but asserts nothing at all if A is false.
- But then (1) is again reduced to the assertion that the speaker hates waking up early.

Assertion And Conditionals Assertion And Conditionals:

Assertion and Conditionals Anthony Appiah, 1985-09-19 This book develops in detail the simple idea that assertion is the expression of belief In it the author puts forward a version of probabilistic semantics which acknowledges that we are not perfectly rational and which offers a significant advance in generality on theories of meaning couched in terms of truth conditions It promises to challenge a number of entrenched and widespread views about the relations of language and mind Part I presents a functionalist account of belief worked through a modified form of decision theory In Part II the author generates a theory of meaning in terms of assertibility conditions whereby to know the meaning of an assertion is to know the belief it expresses *Conditionals, Paradox, and Probability* Lee Walters, John Hawthorne, 2021 Conditionals Paradox and Probability comprises fifteen original essays on themes from the work of Dorothy Edgington the first woman to hold a chair in philosophy at Oxford Eminent contributors from philosophy and linguistics discuss a range of topics including conditionals vagueness knowledge reasoning and probability **Reasoning with Attitude** Luca Incurvati, Julian J. Schlöder, 2023 Certain combinations of sounds or signs on paper are meaningful What makes it the case that unlike most combinations of sounds or signs they have meaning What is this meaning that they have And what is it to understand this meaning The traditional answers to these questions are based on the idea that words stand for something but it is difficult to say what words such as good if or probable stand for This book advances novel answers based on the idea that words get their meaning from the way they are used to express states of mind and what follows from them It articulates a precise version of this idea at a time when the shortcomings of the traditional answers are hotly discussed *Functions of Head and Body Movements in Austrian Sign Language* Andrea Lackner, 2017-12-04 Over the past decades the field of sign language linguistics has expanded considerably Recent research on sign languages includes a wide range of subdomains such as reference grammars theoretical linguistics psycho and neurolinguistics sociolinguistics and applied studies on sign languages and Deaf communities The SLDC series is concerned with the study of sign languages in a comprehensive way covering various theoretical experimental and applied dimensions of sign language research and their relationship to Deaf communities around the world The series provides a multidisciplinary **Knowledge and Conditionals** Robert Stalnaker, 2019 Robert C Stalnaker presents a set of essays on the structure of inquiry In the first part he focuses on the concepts of knowledge belief and partial belief and on the rules and procedures we use or ought to use to determine what to believe and what to claim that we know In the second part he examines conditional statements and conditional beliefs their role in epistemology and their relations to causal and explanatory concepts such as dispositions objective chance relations of dependence and independence A central concern of the book is the interaction of different cognitive perspectives the ways in which the attitudes of rational agents are or should be influenced by critical reflection on their present cognitive situation on their own cognitive situations at other times and on the cognitive situations of others with whom they interact The general

picture that is developed is naturalistic following Hume in rejecting a substantive role for pure reason in the defense of inductive rules and in giving causal concepts a central role in the description and explanation of our cognitive practices. However, Stalnaker rejects the side of Hume that aims to reduce concepts involving natural necessity to more basic descriptive concepts. Instead, he argues that the development of inductive rules and practices takes place in interaction with the development of concepts for giving a theoretical description of the world. **Logica magna** Paolo (Veneto), 1990

Context Robert Stalnaker, 2014-07-24 Robert Stalnaker explores the notion of the context in which speech takes place, its role in the interpretation of what is said and in the explanation of the dynamics of discourse. He distinguishes different notions of context, but the main focus is on the notion of context as common ground, where the common ground is an evolving body of background information that is presumed to be shared by the participants in a conversation. The common ground is the information that is presupposed by speakers and addressees, and a central concern of this book is with the notion of presupposition and with the interaction of compositional structure with discourse dynamics in the explanation of presuppositional phenomena. Presupposed information includes background information both about the subject matter of a discourse and about the evolving discourse itself, and about the attitudes of the participants in the discourse, including who and where they are and what they agree and disagree about. Stalnaker provides a way of representing self-locating information that helps to explain how it can be shared and communicated and how it evolves over time. He discusses the semantic and pragmatics of conditionals and epistemic modals and their role in representing agreement, disagreement, and the negotiation about how a context should evolve. The book concludes with a discussion of the relations between contextualism and semantic relativism. The Context and Content series is a forum for outstanding original research at the intersection of philosophy, linguistics, and cognitive science. The general editor is François Recanati, Institut Jean Nicod, Paris.

Content and Modality Judith Thomson, Alex Byrne, 2006-10-12 Eleven distinguished philosophers have contributed specially written essays on a set of topics much debated in recent years, including physicalism, qualia, semantic competence, conditionals, presuppositions, two-dimensional semantics, and the relation between logic and metaphysics. All these topics are prominent in the work of Robert Stalnaker, a major presence in contemporary philosophy, in honour of whom the volume is published. It also contains a substantial new essay in which Stalnaker replies to his critics and sets out his current views on the topics discussed. Contributors: Richard Heck, Frank Jackson, William Lycan, Vann McGee, John Perry, Paul Pietroski, Sydney Shoemaker, Scott Soames, Daniel Stoljar, Timothy Williamson, and Stephen Yablo. *Attitudes and Changing Contexts* Robert van Rooij, 2006-03-30 In this book, the author defends a unified externalist account of propositional attitudes and reference and formalizes this view within possible world semantics. He establishes a link between philosophical analyses of intentionality and reference and formal semantic theories of discourse representation and context change. Stalnakerian diagonalization plays an important role here. Anaphora are treated as referential expressions while presupposition is seen as

a propositional attitude The relation between belief change and the semantic analyses of conditional sentences and evidential knowledge and buletic desire propositional attitudes is discussed extensively The Thinking Mind Niall Galbraith, Erica Lucas, David Over, 2016-10-14 The field of thinking has undergone a revolution in recent years opening itself up to new perspectives and applications The traditional focus on laboratory based thinking has transformed as theoretical work is now being applied to new contexts and real world issues This volume presents a state of the art survey of human thinking in everyday life based around and in tribute to one of the field s most eminent figures Ken Manktelow In this collection of cutting edge research Manktelow s collaborators and colleagues review a wide range of important and developing areas of inquiry This book explores modern perspectives on a variety of traditional and contemporary topics including Wason s reasoning tasks logic meta reasoning and the effect of environment and context on reasoning The Thinking Mind offers a unique combination of breadth depth theoretical exploration and real world applications making it an indispensable resource for researchers and students of human thinking *Conditional Reasoning* Raymond S. Nickerson, 2015 This book reviews the work of prominent psychologists and philosophers on conditional reasoning It provides empirical research on how people deal with conditional arguments and examines how conditional statements are used and interpreted in everyday communication It also includes philosophical and theoretical treatments of the mental processes that support conditional reasoning making it an ideal resource for students teachers and researchers with a focus in cognition across disciplines

Justin Khoo,2022 Despite its small stature if occupies a central place both in everyday language and the philosophical lexicon In allowing us to talk about hypothetical situations if raises a host of thorny philosophical puzzles about language and logic Addressing them requires tools from linguistics logic probability theory and metaphysics Justin Khoo uses these tools to navigate a maze of interconnected issues about conditionals some of which include the nature of linguistic communication the relationship between logical and natural languages and the relationship between different kinds of modality According to Khoo s theory conditionals form a unified class of expressions which share a common semantic core that encodes inferential dispositions Thus rather than represent the world conditionals are devices used to communicate how we are disposed to infer Khoo shows that this theory can be extended to predict the probabilities of conditionals as well as how different kinds of conditionals differ both semantically and pragmatically Khoo s book will make for a significant contribution to the literature on conditionals and should be of interest to philosophers linguists and computer scientists **Comparative Germanic**

Syntax Peter Ackema,2012 The present volume contains a selection of papers presented at the 23rd and 24th Comparative Germanic Syntax Workshop held at the University of Edinburgh and the Hogeschool Universiteit Brussels The contributions provide new perspectives on several topics of current interest for syntactic theory on the basis of comparative data from a wide range of Germanic languages Among the theoretical and empirical issues explored are various ellipsis phenomena the internal structure of the DP the syntax morphology interface the syntax semantics interface Binding Theory various diachronic developments and do support type phenomena This book is of interest to syntacticians with an interest in theoretical comparative and or diachronic work as well as to morphologists and semanticists interested in the connections their fields have with syntax It will also be of interest to graduate and advanced undergraduate students in linguistic disciplines Making Up Your Mind Robert Mutti,2002-09-04 This focused text is directed consistently towards teaching students to write their own arguments so as to better understand their own thoughts and present them to others in a clear written form The text also provides a distinctive discussion of the role of emotion in argument under the concept of emotional intelligence and includes a wide range of exercises In introducing students to the nature of argument and especially ethical argument Making Up Your Mind features a comprehensive introduction to the logical forms of assertions and the most common forms of expression in English The book then shows how to use all the main terms of argument and provides a brief

introduction to the most common forms of syllogism The deductive and inductive aspects of argument are treated and students are taught a basic technique of testing arguments for validity Making Up Your Mind provides an argument outline which can be used to organize virtually any ethical argument This argument outline also provides a realistic context in which to study the most important informal fallacies and learn how to avoid them In its closing chapters the book discusses the nature of good evidence and good sources of evidence and their role in argument Included are discussions of scientific method the logical form of arguments about causal theories and arguments from analogy Making Up Your Mind - Revised Edition Robert Mutti,2014-01-24 Making Up Your Mind is oriented toward the writing of arguments It gives students techniques that they can use to better understand organize and present their own thoughts The book provides an exceptionally clear statement of what critical thinking adds to the study of logic along with complete and systematic coverage of all crucial logical operators and major logical relations It also offers exceptionally clear and informative discussions of the definition of argument the distinction between induction and deduction and the role of emotion in argument The second half of the book presents an argument outline which students can use to organize virtually any ethical argument This outline is also used to illustrate the most important informal fallacies and how they can be avoided In its closing chapters the book discusses the nature of good evidence and good sources of evidence and their role in argument Included are discussions of scientific method the logical form of arguments about causal theories and arguments from analogy **Foundations of Metacognition** Michael J. Beran,2012-09-06 Metacognition refers to the awareness an individual has of their own mental processes In the past thirty years metacognition research has become a rapidly growing field of interdisciplinary research within the cognitive sciences This book brings together leading cognitive scientists to consider some of the key questions regarding this phenomenon
