**Computer-Aided Design and Manufacturing** U. Rembold,R. Dillmann,2012-12-06 Manufacturing contributes to over 60 % of the gross national product of the highly industrialized nations of Europe The advances in mechanization and

automation in manufacturing of international competitors are seriously challenging the market position of the European countries in different areas. Thus it becomes necessary to increase significantly the productivity of European industry. This has prompted many governments to support the development of new automation resources. Good engineers are also needed to develop the required automation tools and to apply these to manufacturing. It is the purpose of this book to discuss new research results in manufacturing with engineers who face the challenge of building tomorrow's factories. Early automation efforts were centered around mechanical gear and cam technology and hardwired electrical control circuits. Because of the decreasing life cycle of most new products and the enormous model diversification, factories cannot be automated efficiently any more by these conventional technologies. With the digital computer, its fast calculation speed and large memory capacity, a new tool was created which can substantially improve the productivity of manufacturing processes. The computer can directly control production and quality assurance functions and adapt itself quickly to changing customer orders and new products.

Construction Specifications Writing Mark Kalin, Robert S. Weygant, Harold J. Rosen, John R. Regener, 2011-09-13  
Updated edition of the comprehensive rulebook to the specifier's craft. With this latest update, *Construction Specifications Writing* Sixth Edition continues to claim distinction as the foremost text on construction specifications. This mainstay in the field offers comprehensive practical and professional guidance to understanding the purposes and processes for preparation of construction specifications. This new edition uses real world document examples that reflect current writing practices shaped by the well established principles and requirements of major professional associations including the American Institute of Architects (AIA), the Engineers Joint Contract Documents Committee (EJCDC) and the Construction Specifications Institute (CSI). Also included are guidelines for correct terminology, product selection, organization of specifications according to recognized CSI formats and practical techniques for document production. Fully revised throughout, this Sixth Edition includes updates to MasterFormat 2004 as well as SectionFormat, PageFormat 2007 and UniFormat. End of chapter questions and specification writing exercises. Samples of the newly updated construction documents from the AIA. New chapter on sustainable design and specifications for LEED projects. Updated information on the role of specifications in Building Information Modeling (BIM).
