## **Beam Wave Interaction In Periodic And Quasi Periodic Structures Particle Acceleration And Detection:**

Beam-Wave Interaction in Periodic and Quasi-Periodic Structures Levi Schächter, 2013-03-09 During the past seven years I have been involved in the investigation of high power microwave sources for accelerator and radar applications As for many others before me the starting point of this book was a collection of notes on theoretical topics out of the material I had been working on The notes were the core of a course for graduate students at Cornell University When I started to prepare these notes it seemed a fairly straight forward and not very time consuming task since I had most of the material well organized Today three years after the preparation of the first notes I can only wonder how naive this thought was Most of my work was oriented towards analytic and quasi analytic techniques for the investigation of the interaction of an electron beam with electromagnetic waves These topics are presented in Chaps 4 and 6 However for a systematic elaboration of these topics it was necessary to provide some general background therefore parts of what are today Chaps 2 3 and 5 were prepared Related topics of acceleration concepts were also prepared to some extent but I ran out of time and the material Chap 8 was not delivered In the meantime various sections of this book were taught at the Technion Israel Institute of Technology and Ben Gurion University In the last version I included a discussion on free electron lasers Chap 7

*The Particle Detector BriefBook* Rudolf K. Bock, Angela Vasilescu, 2013-03-14 This BriefBook is a much extended glossary or a much condensed handbook depending on the way one looks at it It deals with detectors in particle and nuclear physics experiments The authors describe in encyclopedic format the physics the application and the analysis of data from these detectors Ample reference is made to the published literature An introduction for newcomers a reference for scientists

Melnikov, Haisheng Ji, Zongjun Ning, 2018-01-31 This book provides results of analysis of typical solar events statistical analysis the diagnostics of energetic electrons and magnetic field as well as the global behavior of solar flaring loops such as their contraction and expansion It pays particular attention to analyzing solar flare loops with microwave hard X ray optical and EUV emissions as well as the theories of their radiation and electron acceleration transport The results concerning influence of the pitch angle anisotropy of non thermal electrons on their microwave and hard X ray emissions new spectral behaviors in X ray and microwave bands and results related to the contraction of flaring loops are widely discussed in the literature of solar physics The book is useful for graduate students and researchers in solar and space physics
