Crime and Criminal Justice in American Society Randall G. Shelden, William B. Brown, Karen S. Miller, Randal B. Fritzler, 2015-06-22 Today's headlines vividly illustrate the importance of understanding aspects of the criminal justice system too often ignored While the second edition of Crime and Criminal Justice in American Society includes the most recent statistics on the police courts and corrections its provocative current examples also spur critical thinking about justice in the United States The authors offer an alternative interpretation of criminal justice rarely presented in traditional textbooks or by the media They encourage readers to examine their beliefs about crime punishment and the law Discussions in the chapters about how African Americans Hispanics whites women juveniles the rich and the poor experience crime and the criminal justice system contribute context for understanding different viewpoints The poor and minorities are the most likely to be caught in the net of criminal justice but inequities have consequences for everyone Reflection on various perspectives provides helpful input for assessing attitudes and for becoming actively involved with issues that have significant consequences Eighteen thoroughly revised chapters present historical backgrounds theories and emerging issues New to the second edition is a chapter on veterans involved in the criminal justice system Affordable succinct and engaging this textbook presents the key concepts of the criminal justice system at less than half the cost of many competing textbooks

Life of American Snipers: Chris Kyle and the Rest of the Elite Snipers Mark Dawn, 2015-02-27 American snipers have gained increased popularity after the production of the movie American Sniper based on the life of Chris Kyle who served as a sharp shooter in Iraq consecutively for about four periods Sharp shooter is the less common term to describe snipers whose role in history started in the World War Famous snipers have since emerged forming part of the elite Navy Seals While some people refer to snipers as cowards because they do seem to not be actively engaged in combat they have been hailed as heroes due to the reduced misses during combat and the flexibility of their attack to rely on stealth American snipers have played a huge role in eliminating some of the terrorists bent on causing terror around the world Snipers are originally meant to increase the chances of winning a war They do this by neutralizing the most dangerous people in war from a concealed distance and thereby serve to provide an advantage to their side

Bully Nation Charles Derber, Yale R. Magrass, 2017-12-17 It's not just the bully in the schoolyard that we should be worried about The one on one bullying that

dominates the national conversation this timely book suggests is actually part of a larger problem a natural outcome of the bullying nature of our national institutions And as long as the United States embraces militarism and aggressive capitalism systemic bullying and all its impacts at home and abroad will persist as a major crisis Bullying looks very similar on the personal and institutional levels it involves an imbalance of power and behavior that consistently undermines its victim securing compliance and submission and reinforcing the bully's sense of superiority and legitimacy The similarity this book tells us is not a coincidence Applying the concept of the sociological imagination which links private problems and public issues authors Charles Derber and Yale Magrass argue that individual bullying is an outgrowth and a necessary function of a larger social phenomenon Bullying is seen here as a structural problem arising from systems organized around steep power hierarchies from the halls of the Pentagon Congress and corporate offices to classrooms and playing fields and the environment Dominant people and institutions need to create a culture in which violence and aggression are seen as natural and just one where individuals compete over who will be bully or victim and each is seen as deserving their fate within this hierarchy The larger the inequalities of power in society or among nations or even across species the more likely it is that both institutional and personal bullying will become commonplace The authors see the life long psychological scars interpersonal bullying can bring but believe it is almost impossible to reduce such bullying without first challenging the institutions that breed and encourage it In the United States a system of intertwined corporations governments and military institutions carries out systemic bullying to create profits and sustain its own power While acknowledging the diversity and savagery of many other bully nations the authors contend that America as the most powerful nation in the world and one that aggressively promotes its system as a model merits special attention It is only by recognizing the bullying built into this model that we can address the real problem and in this Bully Nation makes a hopeful beginning

Soldier of Fortune ,2007 **Real-World Media Ethics** Philippe Perebinosoff,2016-07-15 Is it ethical to pass yourself off as black if you are Caucasian as Rachel Dolezal the president of a local chapter of the NAACP did in 2015 Was it ethical for Donald Sterling the former owner of the NBA team to use racially inflammatory language Is it ethical to

exaggerate or fabricate the importance of one's role as Brian Williams apparently did when he anchored the NBC nightly news. Is it ethical for a journalist to pay a source for a story, tips, and photos as TMZ, Gawker, and others do regularly? The above questions, as well as other questions, definitely illustrate the need for studying ethics. *Real World Media Ethics* provides a wide showcase of real ethical issues faced by professionals in the media field. Numerous case studies allow readers to explore multiple perspectives while using realistic ethical principles. This book includes the basics in ethical journalism as well as the tools to navigate through the landscape of mass media such as public relations, entertainment, and other forms of visual communication. The second edition has been updated to encompass globalization, new media platforms, current copyright issues, net neutrality, sports ethics, and more. An accompanying companion website provides additional interviews demonstrating ethical principles in practice. Being a former ABC executive, author Philippe Perebinosoff gives readers an inside look at circumstances with an ethical, experienced eye. Constructing Ecoterrorism John

Sorenson, 2016-07-01T00:00:00Z. Animal rights is an important social justice movement, and the animal rights movement presents ethical and political challenges to deeply rooted structures of violence and exploitation, challenging ideologies of capitalism and speciesism. Corporate interests that form the animal industrial complex understand the animal rights movement as a threat to their profits and have mobilized to undermine it. Informed by both critical animal studies and critical terrorism studies, John Sorenson analyzes ecoterrorism as a social construction. He examines how corporations that profit from animal exploitation fund and produce propaganda to portray the compassionate goals and nonviolent practices of animal activists as outlandish, anti-human campaigns that operate by violent means not only to destroy Western civilization but also to create actual genocide. The idea of concern for others is itself a dangerous one, and capitalism works by keeping people focused on individual interests and discouraging compassion and commitment to others. Driven by powerful and wealthy industries founded upon the exploitation of nonhuman animals and the extraction of natural resources, the discourse of ecoterrorism is a useful mechanism to repress criticism of the institutionalized violence and cruelty of these industries as well as their destructive impact on the environment, their major contribution to global warming and ecological disaster, and their negative impacts on human health. Further, by deliberately constructing an image of activists as dangerous and violent terrorists, these corporations and their representatives in government have created a widespread climate of fear that is very useful in legitimizing calls for more policing and more repressive legislation such as Bill C 51 in Canada. **Islamophobia**

in Higher Education Shafiqah Ahmadi, Darnell Cole, 2023-07-03. While Islamophobia was present in our society before 9/11, it has become more pervasive in recent years. This is evidenced by the current social and political climate, hate speech, and hate crimes directed at Muslims and the Supreme Court's upholding of Presidential Proclamation 645 that effectively bans Muslim immigration from coming to the U.S. What does this mean for Muslim students in college and indeed for institutions of higher education as they navigate law and policy on the one hand and adhere to their mission of achieving inclusive and equitable

educational environments on the other Two thirds of Muslims in the U S are vexed with current policy and there has been an alarming increase in reports of bigotry and discrimination against them since the 2016 presidential elections The fear of Islam in general and Muslims specifically not only compels non Muslims to differentially treat Muslims but also trade some of their own civil rights and civil liberties under the guise of national security To address these issues institutions require a nuanced understanding of laws and policies that institutionalize Islamophobia and a greater understanding of the diverse college students that identify as Muslim This book fills what has been a dearth of research that explores the experiences and navigation of Muslim students in colleges and universities and addresses the even less studied domain of the experiences of Muslim students who hold multiple marginalized identities such as race ethnicity and LGBTQ status as well as the intersection of those identities that may create multiple burdens of oppression and discrimination This book begins by critically engaging with how current laws and policies institutionalize Islamophobia and affect the intersectionality and diversity within the Muslim community It includes multidisciplinary voices such as an international human rights attorney a civil rights attorney a criminal law attorney student affairs practitioners and research faculty whose work on this marginalized student population is traditionally not recognized within academic settings and brings the voices of female Muslim scholars to the fore Each chapter includes a critical analysis of the literature a legal analysis when appropriate a set of recommendations for policy and practice and discussion questions

Clear and Present Safety Michael A. Cohen, Micah Zenko, 2019-03-26

An eye opening look at the history of national security fear mongering in America and how it distracts citizens from the issues that really matter What most frightens the average American Terrorism North Korea Iran But what if none of these are probable or consequential threats to America What if the world today is safer freer wealthier healthier and better educated than ever before What if the real dangers to Americans are noncommunicable diseases gun violence drug overdoses even hospital infections In this compelling look at what they call the Threat Industrial Complex Michael A Cohen and Micah Zenko explain why politicians policy analysts academics and journalists are misleading Americans about foreign threats and ignoring more serious national security challenges at home Cohen and Zenko argue that we should ignore Washington's threat mongering and focus instead on furthering extraordinary global advances in human development and economic and political cooperation At home we should focus on that which actually harms us and undermines our quality of life substandard schools and healthcare inadequate infrastructure gun violence income inequality and political paralysis
