American Sniper Videos:

ISIS Propaganda Stephane Baele, Katharine A. Boyd, Travis G. Coan, 2020 This book offers a comprehensive overview and analysis of the Islamic State's use of propaganda. Combining a range of different theoretical perspectives from across the social sciences and using rigorous methods, the authors trace the origins of the Islamic State's message, laying bare the strategic logic guiding its evolution, examining each of its multi-media components and showing how these elements work together to radicalize audiences' worldviews. This volume highlights the challenges that this sort of full-spectrum propaganda raises for counter-terrorism forces. It is not only a one-stop resource for any analyst of IS and Salafi jihadism but also a rich contribution to the study of text and visual propaganda, radicalization and political violence and international security.

Through the Crosshairs Roger Stahl, 2018-06-21 Now that it has become so commonplace we rarely blink an eye at camera footage framed by the crosshairs of a sniper's gun or from the perspective of a descending smart bomb. But how did this weaponized gaze become the norm for depicting war and how has it influenced public perceptions? *Through the Crosshairs* traces the genealogy of this weapon's eye view across a wide range of genres including news reports, military public relations images, action movies, video games and social media posts. As he tracks how gun-camera footage has spilled from the battlefield onto the screens of everyday civilian life, Roger Stahl exposes how this raw video is carefully curated and edited to promote identification with military weaponry rather than with the targeted victims. He reveals how the weaponized gaze is not only a powerful propagandistic frame but also a prime site of struggle over the representation of state violence.

God and Country: A True Story of My Journey through Indoctrination, Violence, and Jihad Will

Prentiss, 2019-01-16 Will Prentiss grew up in a broken home struggling for guidance. As a teenager he moved in with his mother who was part of a Christian group. But he was subjected to violent abuse until he fled in fear of his life. Searching for meaning, still seeking his grounding through faith, he eventually found himself at a mosque and decided to become a Muslim. He became a strong advocate of his new community, married a Muslim woman and faced discrimination after the 9/11 terrorist attacks. But when Muslim friends began planning to go abroad to carry out jihad, he started working with the FBI. Although he felt compromised and conflicted, he took pride in knowing that he was protecting his community and serving his country, but that did not assuage the guilt he felt in betraying his community. Focused on themes such as morality, justice and what it means to be an American, this account offers insights into a religion that is deeply misunderstood while sharing the true story of someone weighing the balance between faith and patriotism. *The Palgrave Handbook of Violence in Film and Media* Steve Choe, 2022-11-09 The chapters contained in this handbook address key issues concerning the aesthetics, ethics and politics of violence in film and media. In addition to providing analyses of representations of violence, they also critically discuss the phenomenology of the spectator, images of atrocity in international cinema, affect and documentary, violent video games, digital infrastructures, cruelty in art cinema and media and state violence among many other relevant topics. The

Palgrave Handbook of Violence in Film and Media updates existing studies dealing with media and violence while vastly expanding the scope of the field. Representations of violence in film and media are ubiquitous but remain relatively understudied. Too often they are relegated to questions of morality, taste or aesthetics while judgments about violence can themselves be subjected to moral judgment. Some may question whether objectionable images are worthy of serious scholarly attention at all. While investigating key examples, the chapters in this handbook consider both popular and academic discourses to understand how representations of violence are interpreted and discussed. They propose new approaches and raise novel questions for how we might critically think about this urgent issue within contemporary culture.

An End to al-Qaeda Malcolm Nance, 2025-06-25 Osama Bin Laden is unquestionably the leader of the world's most deadly terrorist cult. He has perverted the teachings of Islam to create a fringe religious ideology, Bin Ladenism, where only al-Qaeda speaks for God. In his cult, suicide bombing is the highest form of worship and the mass murder of Muslims proves one's devotion. Al-Qaeda's 9/11 attack on the United States was just a small part of Bin Laden's long-term strategy to win a civil war for control of Islam. By fighting his terrorists solely with bullets and bombs and ignoring his war on Islam, we have bolstered Bin Laden's recruiting efforts abroad, undermined civil liberties and economic security at home, and tarnished America's reputation internationally. Career intelligence officer Malcolm Nance proposes a quantum shift in how to eliminate al-Qaeda in less than twenty-four months while recreating America's reputation as a force for good around the world. His plan includes exposing al-Qaeda's mission to create a nuclear-armed terror emirate, incite a Muslim civil war, and eventually seize control of Islam. Challenging and breaking the perceived spiritual link between the mainstream Islam and al-Qaeda's cultist ideology. Attacking al-Qaeda fighters through precision intelligence and special operations missions, thereby reducing the deaths of innocent civilians. Reframing and restoring America's shattered image in the developing world in order to support the global counterterrorism and counterinsurgency campaign. *An End to al-Qaeda* is both a revolutionary blueprint for destroying al-Qaeda and a fierce critique of America's poorly executed war on Bin Laden's terrorists.

Virtual Weaponry Aaron Tucker,2017-10-26 This book examines the convergent paths of the Internet and the American military interweaving a history of the militarized Internet with analysis of a number of popular Hollywood movies in order to track how the introduction of the Internet into the war film has changed the genre and how the movies often function as one part of the larger Military Industrial Media Entertainment Network and the Total War Machine The book catalogues and

analyzes representations of a militarized Internet in popular Hollywood cinema arguing that such illustrations of digitally networked technologies promotes an unhealthy transhumanism that weaponizes the relationships between the biological and technological aspects of that audience while also hierarchically placing the human components at the top Such filmmaking and movie watching should be replaced with a critical posthumanism that challenges the relationships between the audience and their technologies in addition to providing critical tools that can be applied to understanding and potentially resist modern warfare
