Preuhs, Norman Provizer, Andrew Thangasamy, Kenneth F. Warren, Aaron C. Weinschenk, 2015-10-29 The 2016 presidential race is arguably already over in 40 states and the District of Columbia If recent presidential election trends are any indication of what will happen in 2016 Democrats in Texas and Republicans in New York might as well stay home on election day because their votes will matter little in the presidential race The same might be said for the voters in 38 other states too Conversely for those in Ohio Florida Colorado Iowa and a handful of other states their votes matter These states will be battered with a barrage of presidential candidate visits commercials political spending and countless stories about them by the media Understanding why the presidential race has been effectively reduced to only ten states is the subject of *Presidential Swing States* Why Ten Only Matter Stacey Hunter Hecht and David Schultz offer a first of its kind examination of why some states are swing states in presidential elections capable of being won by either of the major candidates *Presidential Swing States* describes what makes these few states unique and why the presidency is decided by who wins them With cases studies written by prominent political scientists who are experts on these swing states *Presidential Swing States* also explains why some states have been swing states but no longer are why some are swinging and what states beyond 2016 may be the future ones that decide the presidency

Blue Metros, Red States David F. Damore, Robert E. Lang, Karen A. Danielsen, 2020-10-06 Assessing where the red blue political line lies in swing states and how it is shifting Democratic leaning urban areas in states that otherwise lean Republican is an increasingly important phenomenon in American politics one that will help shape elections and policy for decades to come Blue Metros Red States explores this phenomenon by analyzing demographic trends voting patterns economic data and social characteristics of twenty seven major metropolitan areas in thirteen swing states that will ultimately decide who is elected president and the party that controls each chamber of Congress The book's key finding is a sharp split between different types of suburbs in swing states Close in suburbs that support denser mixed use projects and transit such as light rail mostly vote for Democrats More distant suburbs that feature mainly large lot single family detached houses and lack mass transit often vote for Republicans The book locates the red blue dividing line and assesses the electoral state of play in every swing state This red blue political line is rapidly shifting however as suburbs urbanize and grow more demographically diverse Blue Metros Red States is especially timely as the 2020 elections draw near

Tiny You Jennifer L. Holland,2020-04-07 Caroline Bancroft History Prize 2021 Denver Public Library Armitage Jameson Prize 2021 Coalition of Western Women s History David J Weber Prize 2021 Western History Association W Turrentine Jackson Prize 2021 Western History Association Tiny You tells the story of one of the most successful political movements of the twentieth century the grassroots campaign against legalized abortion While Americans have rapidly changed their minds about sex education pornography arts funding gay teachers and ultimately gay marriage opposition to legalized abortion has only grown As other socially conservative movements have lost young activists the pro life movement has successfully recruited more young people to its cause Jennifer L Holland explores why abortion dominates conservative politics like no other cultural issue Looking at anti abortion movements in four western states since the 1960s turning to the fetal pins passed around church services the graphic images exchanged between friends and the fetus dolls given to children in school she argues that activists made fetal life feel personal to many Americans Pro life activists persuaded people to see themselves in the pins images and dolls they held in their hands and made the fight against abortion the primary bread and butter issue for social conservatives Holland ultimately demonstrates that the success of the pro life movement lies in the borrowed logic and emotional power of leftist activism

Color Coded Walter Nugent, 2018-10-15 The now staunchly red state of Texas was deep blue in 1950 and had virtually no functioning Republican Party California on the other hand was reliably red Today both states have jumped to the opposite end of the political spectrum Texas is one of the most conservative states while California has become one of today's most liberal bastions These are the most dramatic cases but notable shifts in voting patterns have occurred throughout the western states in recent decades shifts so varied and complex that they have until now eluded the attention focused on the drastic examples of the South and Northeast Bringing clarity to the remarkably mixed yet poorly understood map of America's red blue and purple western half **Color Coded** presents the first comprehensive history of political change and stability in the region between 1950 and 2016 The West in Walter Nugent's analysis includes nineteen states the thirteen that the U S Census Bureau calls the Western Region roughly from the Rocky Mountains to the Pacific as well as off shore Alaska and Hawaii plus the six Great Plains states from North Dakota south to Texas Consulting official voting results of more than 5 300 state and national elections as well as newspaper reports oral histories public documents and other sources Nugent reveals the ever shifting patterns that have defined western politics in modern times Geography culture history political trajectories and the charisma of key political actors have all played their part in these changes and will Nugent asserts continue to do so for the foreseeable future A powerful exhaustively researched study of modern political organization party development and shifting voter blocs in the West **Color Coded** deftly charts as well the profound red blue tensions that have defined modern America Returns for the 5 300 plus elections on which the book is based covering the nineteen western states between 1950 and 2016 are compiled in the book's appendix

California Francesco Costa, 2022-09-13 Quando noi italiani pensiamo alla nazione che vorremmo diventare cosa ci viene in mente Probabilmente vorremmo avere un'economia in grande crescita e la piena occupazione un paese in cui chiunque voglia lavorare possa farlo Vorremmo avere le migliori università del pianeta e bellezze naturali adeguatamente valorizzate prodotti culturali dall'influenza globale e la possibilità di definire made in Italy non solo un paio di scarpe ma anche un app capace di costruire il futuro e un'idea che sappia cambiare il mondo Vorremmo essere il posto ideale per chiunque voglia realizzare i propri sogni per chiunque abbia un progetto e cerchi le condizioni ideali per trasformarlo in realtà e magari anche avere una classe dirigente progressista sensibile accogliente Insomma

vorremmo essere un po' piú come la California che infatti da secoli considerata la fine del mondo un paradiso di tolleranza prosperit  e paesaggi spettacolari la terra promessa la piú pura incarnazione del sogno americano Eppure in California qualcosa si inceppato tanto che da anni le persone che la lasciano sono piú di quelle che vi arrivano e dall'ultimo censimento la sua popolazione risulta per la prima volta diminuita Niente di tutto questo dovrebbe accadere in teoria Salvo in caso di guerre e catastrofi naturali nella nostra epoca i movimenti migratori seguono direzioni segnate dall'economia e dall'occupazione le persone vanno via dai posti che offrono meno opportunit  per raggiungere posti che ne offrono di piú Quella della California una crisi unica al mondo ma l'acuta analisi di Francesco Costa ci mostra che le sue ragioni non sono esclusivamente californiane cominciamo a riscontrarle anche dalle nostre parti Le citt  come unici possibili centri propulsivi della crescita economica La qualit  della vita distrutta dai prezzi delle case Un radicalismo politico infantile La divaricazione del mercato del lavoro fra chi possiede un'istruzione di alto livello e chi no Le discriminazioni razziali La catastrofe climatica L'attivismo performativo Le crescenti diseguaglianze fra generazioni La crisi della California ci costringe a interrogarci sulla realt  che ci circonda e ci invita a stare attenti a ci  che desideriamo perch  potremmo ottenerlo
